Dura-Green® for Clean Rooms

Features

- Meets or exceeds 100 level clean room standards
- Outperforms yellow zinc dichromate when tested in accordance with ASTM-E595-93
- Less expensive than alternate materials or finishes

Dura-Green® is a water borne epoxy coating which is applied by a precisely controlled cathodic electro-deposition process. A conveyor is used to transport the channel and fittings through a 9-step process for cleaning, phosphatizing, and paint application. In addition, the channel is cured for 20 minutes at a temperature of 375°F.

B-Line's Dura-Green® channel meets or exceeds 100 level clean room standards. This was confirmed by testing the channel in accordance with ASTM-E595-93. Dura-Green® was found to be a superior finish, due in part to its proven application process.

Dura-Green® channel is available in standard lengths of 10' and 20'. In addition, cut length channels are available upon request.

Dura-Green® Hangers

Features

- Out performs Red Primer and Electro-Zinc plating.
- Superior indoor corrosion protection.
- Durable and scratch resistant.
- Epoxy paint.
- Electrically bonded finish.
- Excellent for clean room applications - meets or exceeds 100 level clean room standards (see below).

B-Line's new Dura-Green® hangers offer an excellent alternative to traditional hanger finishes. The durable epoxy finish out-performs both red primer and electro-zinc plated products in standard salt spray tests conducted in accordance with ASTM B117. Additionally, Dura-Green® hangers offer long-term cost advantages over "plain finish" hangers.

Dura-Green® is a water borne epoxy paint applied by cathodic electro deposition and is available exclusively from B-Line. The nine-step process delivers a corrosion - resistant bonding of coating to material. Dura-Green® effectively, resists scratching and peeling.

Dura-Green® offers all the benefits to meet your hanger needs and is available exclusively from B-Line, **your pipeline to the future**.

B-Line's Dura-Green® channel meets or exceeds 100 level clean room standards. This was confirmed by testing the channel in accordance with Boeing (PCL) Standards, which are more stringent and complete than ASTM E595-93. Dura-Green® was found to be a superior finish, due in part to its proven application process.
