Rack security products

Patch panel protectors, server boots and doors

At Eaton, we know that it’s critical to protect your equipment and network. That’s why our Network Rack security products are designed to be an effective solution for physical layer security for IT applications in finance, healthcare, government, institutional, and retail marketing.

To help reduce your cost while maintaining security, consider our Security Doors, Patch Panel Protectors and Server Boots for your next data center project.

**FEATURES**

- **Security**: Hardware attaches inside the enclosure and is not accessible when door is locked.
- **Easy Access Control**: Access requires only the key, eliminating the need for special equipment or passwords and access codes.
- **Visibility**: Mesh doors provide equipment visibility.
- **Retrofit**: These products can be installed on racks and cabinets with existing equipment.
- **Bend Radius Protection**: Patch Panel Protectors come with special drop outs to protect cable bend radius.
Rack security doors

Rack security doors are designed for field installation on existing racks with no need to shut off current equipment.

- Provides security for 84" racks
- For use on two post, non-welded racks

***Six - #12-24 x 5/8" combo pan head mounting screws included.

---

Server boots

Server boots are designed to help restrict access to 1U, 2U, 4U, 5U or 20U servers, and can work with any rack or enclosure application.

- Limits server access
- Designed for shallow equipment that does not extend in front of the rack
- Suitable for DVR applications and switches
- Fully enclosed top, bottom, and sides
- All front server attachment hardware is enclosed inside server boot
- Deep enclosure extends out in front of the rack for patching and gear on 5U and 20U sizes
- Keys are keyed alike
- Finish: flat black powder coat

Each includes:
- One (1) server boot enclosure with lock
- Two (2) keys

---

Server boots with extension rails

Server boots with extension rails (2) for backs of sliding server systems.

---

Patch Panel Protectors

Patch panel protectors help restrict unauthorized access to 1U or 4U patch panels by fully enclosing the front of the panel and the adjacent rack space.

- Limits access to 1U or 4U patch panels
- Fully enclosed top and bottom
- All front patch panel hardware is enclosed inside patch panel
- Drop outs included to support cable bends
- Keys are keyed alike
- Openings on side for cable exit
- Finish: flat black powder coat

Each includes:
- One (1) patch panel protector enclosure with lock
- Two (2) inner slides
- Four (4) #12-24 x 5/8" combo pan head mounting screws
- Two (2) keys
