

### Modular 19-Inch Blanking Panel Solution

New from Cooper B-Line – a range of universal, modular, EIA 310 compliant, 19-inch PlenaFill™ blanking panels, designed to aid rack and cabinet cooling efficiency.

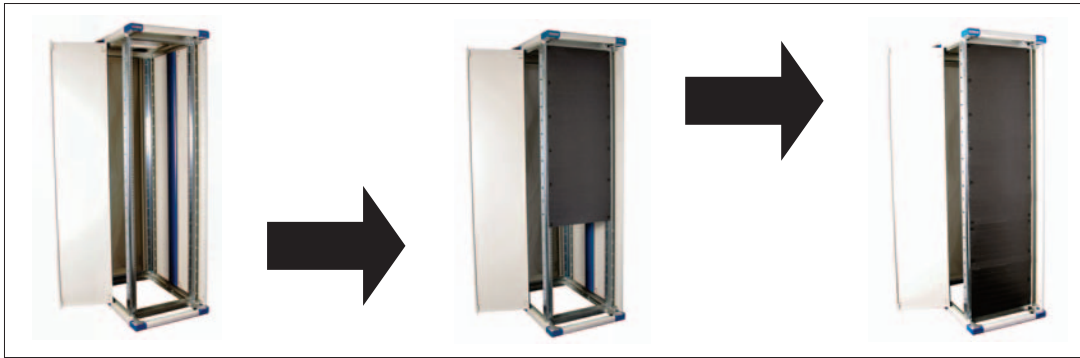

The key to optimizing cooling efficiency within any data center or data room environment is the segregation of the cold air feed from the hot air return. The simple deployment of blanking panels significantly improves the operational efficiency of the rack or cabinet structure, preventing hot exhaust air contaminating the cold air feed.

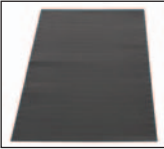

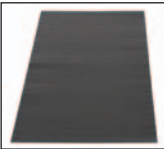

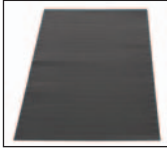

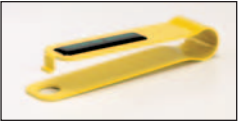

Each blanking panel kit consists of a 27U UL-VO, class 94 fire retardant, plastic blanking panel. Each blanking panel has tear off perforations every 1U, allowing the user to simply and easily adapt the panel to the requirements of each individual installation. A pack of 50 quick fit fixings are also supplied as part of the kit, allowing users the facility to split the kit down into 1U increments or secure the panels at almost every U space.

This easy-to-fit, cost effective system provides the ideal solution to aid operational efficiency, ultimately leading to lower energy consumption.

<p><b>Features</b></p>	<ul style="list-style-type: none"> <li>■ Universal mount to all square hole EIA 310 compliant rails.</li> <li>■ Tear to unit height to suit application.</li> <li>■ Quick fit mounting allowing fitting in seconds.</li> <li>■ Fully re-usable.</li> <li>■ Light weight.</li> </ul>		
<p><b>Benefits</b></p>	<ul style="list-style-type: none"> <li>■ Helps to eliminate recirculation which can lead to hot spots.</li> <li>■ Quickly and easily fills large sections of unoccupied rack space stopping by-pass air flow.</li> <li>■ Cost effective.</li> <li>■ Improves system efficiency.</li> <li>■ Reduced cooling infrastructure operational costs.</li> </ul>
