# Cable Support Systems

Honest Answers from  
**ONE SOURCE.** **COOPER** B-Line

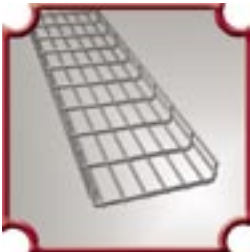

Your Solution through Product Selection.

## Cable Hooks

- Easily attaches to building structure
- Sizes available for supporting up to 16 4-pair UTP CAT 5/5/e6 cables
- Open top for easy cable installation - cable retainer attached
- Factory multiple assemblies available
- X-Hooks are ideal for pulling cable using the Xylan® coating that creates a smooth, frictionless surface that makes it easier to pull cables around corners or any direction changes without costly cable rollers
- **Lead Time: Typical stock**

## Wire Basket

- Major benefit is field adaptability
  - Design on the fly
  - Field fabricated fittings
  - Limited pre-engineering required
  - Fits restricted space applications
- Cable capacity potential, to 144 square inches
- Multiple support methods available
- **Lead Time: Ships from stock**

## Redi-Rail™

- Two side rail, radius fitting cable safety
  - bottom options, ladder, ventilated and solid
  - cable radius control from 3" to 36"
- Up to a 35% installation savings compared to traditional welded cable tray systems
- "I" beam shaped construction allows up to a 12' support spacing
- Multi-functional pre-punched holes on the top and bottom of the rails creates flexible field modification options for rung movement, splice plate hardware and accessories
- Flex connectors for easy direction changes for both vertical and horizontal adjustments
- **Lead Time: 5 to 7 days**

## RUNWAY

- Fits rack and cabinet installation areas
  - Directional changes are made with connectors
  - Hung above or supported from the racks
- Cable load area, 24 sq inches to 216 sq inches
- Cooper B-Line Runway are offered in a variety of finishes
- Provide cable freedom - no side rail
- **Lead Time: in stock to 5 days**

# What's Important to You?

- Cable safety
- Cost
- Cable freedom
- Appearance
- Installer sensitive
- Product availability
- Pre-engineering
- Product support

## Your ONE SOURCE Solution through Product Selection

### Data Track

- Excellent cable freedom - No side rail obstruction for future modifications
- Fast to install - one ATR - splice is the support
- Capacity to 144 sq. inches
- Installation spans to 12 feet - fewer number of supports required
- Flex connectors gives Redi-Rail adaptability for easy direction changes for both vertical and horizontal adjustments
- Lead Time: 5 to 7 days

### Half Rack

- Direct wall mount without brackets - three mount locations per section
- Excellent cable freedom - no side rail obstruction
- Capacity to 72 sq inches
- Lead Time: 5 to 7 days

### Verti-Rack

- Multiple cable paths in one install
- Excellent cable freedom and segregation
- Fast to install - one ATR - splice is the support
- Installation spans to 12 feet - fewer number of supports required
- Capacity to 144 sq inches
- Lead Time: 5 to 10 days

### MULTI-TIER HALF RACK

- Excellent cable freedom for multiple segregation runs
- Multiple cable paths in one install - up to 4 tiers
- Direct wall mount without brackets - three mount locations per section
- Lead Time: 5 to 10 days
