Taking Care of

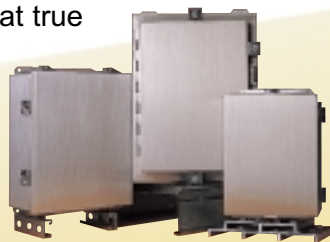

If you're looking for high quality industrial and commercial enclosures, wireway, electronic cabinets, accessories and climate control products, B-Line's got what you need. But we feel there's more to building solid partnerships than simply offering superior products. So we combined an outstanding line with timely delivery and excellent service – so you get what you need when you need it.

Comprehensive Lines

B-Line offers one of the broadest ranges of electrical/electronic enclosures in the industry and we are ready to provide the enclosure solution you need today and tomorrow. Our full line includes Type 1, 3R and 12 wireway and trough; Type 1, 3 and 3R commercial enclosures, Type 12/13, 4 and 4X industrial enclosures; modular enclosures and consoles, plus an extensive variety of accessories and climate control products.

Flawless Construction for Precise Fit

We've always believed that true quality begins at home. That's why we pay so much attention to the manufacturing process. Our fabrication and finishing equipment is purely state-of-the-art, and

Stainless Steel Enclosures

continual upgrades are on the drawing board. We use only the highest quality materials available anywhere. You'll find a complete line-up of enclosures available in fiberglass, aluminum, steel, galvanized steel, plus Type 304 and Type 316 stainless steel. Our paint finishes provide durable, long-lasting protection even in the harshest environments for years of reliable service. Whether you need protection from dust, dirt, oil, water, corrosion or other contaminants, B-Line has the enclosure you need to protect your investments.

Why B-Line Makes a BIG Difference in Electrical Enclosures

You've heard the old adage: "Good enough is never good enough." At B-Line, it's not just a saying, it's our way of doing business. That's why we're always working to bring you the best available products and service. Why we're constantly on the lookout for ways to expand our product line – to provide you with greater convenience and flexibility. Throughout our electrical enclosure line, you will find evidence of our underlying drive to meet these goals of excellence.

the Customer

Tailored to Your Needs

Like every B-Line product, our custom enclosures are built to the most exacting standards. Namely, yours.

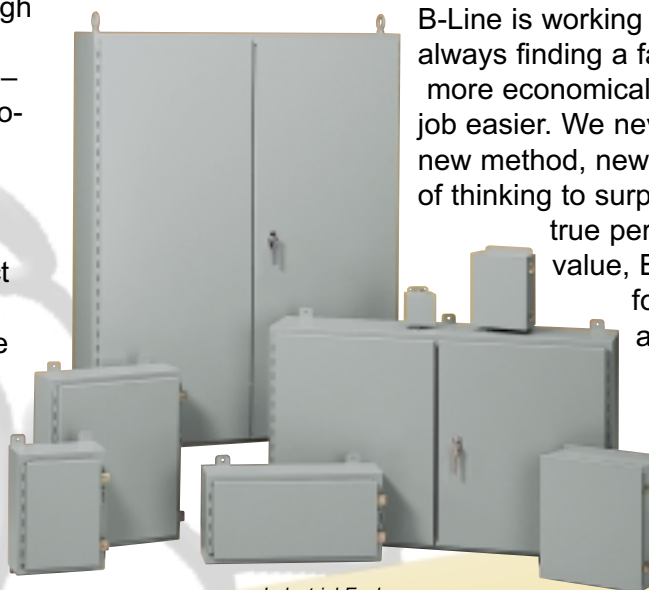

We begin by meeting with you to assess both your needs and your wants – identifying the full scope of your requirements and what role we'll play in developing ways to fulfill them. Whether you desire a turnkey package – from initial concept through production, including CAD/CAM design, engineering and prototyping – or provide your own designs or prototypes, we'll work in partnership with you to develop a plan that best fits your needs.

This plan is then used by our project team to assess progress and make sure that production is always in line with your specifications. Efficient computerized quoting, scheduling and tracking are integral to the whole procedure and serve as an additional "checks and balances" mechanism. What's more, we'll keep you up-to-date on every step and element of the building process. For your own peace of mind.

A wide range of electrical enclosures and accessories are regionally stocked offering you same day shipment. We'll get it to you on time, thanks to our long-standing relationships with the nation's premier shipping carriers. What's more, our factories and distribution centers are strategically located for all your delivery needs.

Special design prototypes can be engineered, manufactured and shipped quickly . . . providing solutions for all of your enclosure requirements.

B-Line is working smarter every day – always finding a faster, better and even more economical way to make your job easier. We never stop looking for a new method, new technology or new way of thinking to surpass your needs. For true performance, quality and value, B-Line is the only choice for Electrical Enclosures and Wireway.
