

Save Time & Money Installing Wire Basket With The Flip Clip™!

Part #: WB46H

Wt. per 100: 10.4 lbs, (4.7 kg)

Box quantity: 50.

Finish: Zinc plated and also stocked in stainless steel.

The Flip Clip from Cooper B-Line gives you a new and convenient way to hang, level and lock in wire basket runs.

Unlike other wire basket fasteners requiring multiple tools, nuts, washers and parts depending on rod thickness, the Flip Clip accommodates both 1/4" and 3/8" rod sizes, and installs quickly with a single screwdriver or pliers—and just one hex nut.

Simply thread the single hex nut onto the threaded rod, slide the clip onto the rod, hang the wire basket on the hooks, and adjust the nut for leveling. Plus, the innovative retainer tabs on each Flip Clip can be easily bent over with a screw driver to lock the threaded rod and wire basket.

Put your time and money to better use on your next wire basket installation—use the convenient new Flip Clip from Cooper B-Line.
