Class CC and supplemental modular ferrule fuse blocks

Description:
BCM (Class CC) and BMM (supplemental 13/32 x 1-1/2” /10x38) modular style fuse blocks with optional covers.
These Bussmann series fuse blocks contain multiple features to add versatility, reduce labor and enhance safety of any panel design.

Specifications
Ratings:
• Volts 600 Vac/dc
• Amps up to 30A
• SCCR up to 200kA (limited by fuse interrupting rating)

Agency information:
• Class CC BCM Series
  • UL Listed File E14853, Guide IZLT
  • CSA Certified 47235-6225-01
  • CE
  • RoHS Compliant
• 13/32” x 1-1/2” (Midget) BMM Series
  • UL Recognized File E14853, Guide IZLT2
  • CSA Certified 47235-6225-01
  • CE
  • RoHS Compliant

• Covers
  • Covers are included in the overall UL Listing/Recognition and CSA Certification
  • IP20 finger-safe
  • RoHS Compliant

Poles:
• 1-, 2-, 3-pole units factory assembled
• Single-pole units snap together to create desired number of poles

Flammability ratings:
• Blocks — UL 94V0, self-extinguishing
• Covers — UL 94HB, self-extinguishing

Features and benefits:
• Available in 1-, 2- and 3-pole configurations to meet stocking requirements.
• Blocks are fully modular with a snap-together design that provides tool-less assembly of multiple pole blocks at point-of-use to reduce inventory and save assembly time and labor.
• DIN-Rail and panel mount versatility allows one product to be used for multiple applications, lowering inventory cost.
• Compact footprint consumes minimal panel space.
• Optional see-through cover enhances safety with IP20 finger-safe protection, lockout/tagout capability and open circuit indication.
• Easy circuit identification with available universal marker labels for fuse block covers.
• Tin-plated bimetallic copper fuse clips deliver superior fatigue resistance compared to traditional spring brass.
• Terminal options to meet application needs including 1/4” spade quick connect terminals for faster panel assembly.

Operating and storage temperature range:
• Blocks -40°C to +120°C
• Non indicating covers -40°C to +120°C
• Indicating covers -20°C to +90°C*

* Indication requires minimum 90Vac/dc and closed circuit to illuminate.
Materials:
- Base — Thermoplastic
- Terminals — Tin-plated bimetallic copper
- Covers — Thermoplastic
- Screws and pressure plates — Zinc-plated steel

Cover catalog numbers:
- For blocks with quick connect terminals — CVRII-CCM-QC
- All other terminal options — CVRII-CCM
