Date: September 24, 2007
To: ABC Fuse Customers
Subject: ABC-x conversion to RoHS Compliant ABC-x-R

In order to comply with the European Union's Restriction of Hazardous Substances (ROHS) Directive, Cooper Bussmann has implemented an aggressive program for converting its ferrule fuse products.

Due to market demands and similar fusing characteristics, product management is encouraging all ABC-x fuse customers to order the ABC-x-R Series.

The RoHS compliant ABC-x-R families are now the primary families used in today's worldwide ¼" ferrule fuse market. They will be the leading family seen in pricing sheets, data sheets, catalogs, etc.

The non-compliant ABC-x families have **not** been made obsolete and will remain available for an indefinite period of time.
