## New exclusive line of multi slow-blow fuses

Circuit protection technology – previously available only through the dealership network – is now available within the Automotive Aftermarket.

The new exclusive line of Bussmann multi slow-blow fuses (MUSBs) satisfy the Automotive Aftermarket's need to provide your customers with the latest in circuit protection technology. The multi slow-blow fuses are the latest in complex, custom built multi-fuses designed for specific vehicle manufacturers. The install base for these fuses range from 2006 – present.

# easyID fuse panels with weatherproof cover

Finding the open fuse on a fuse panel is now easier with the new Bussmann easyID fuse panels. The LED indicators light up when a fuse opens. A clear, weather resistant hard shell cover protects the fuse panel from moisture, dirt and other contaminants. All fuse panels are rated 32 V, up to 25 amps per pole (100 amps max per panel).

The traditional packs may be ordered in single units.

Fuse type	Fuse positions	Trad'l pack*	Retail pack**
