Installation Instructions

SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE

Important

Read carefully before installing and wiring fixture and retain for future reference.
Check the label rating to insure the fixture is suitable for the environment & supply.
The fixture should be installed in accordance with the National Electrical Code and any or codes having jurisdiction over the installation area. All fixtures must be properly grounded.

Warning- All electrical wiring should be done by qualified electricians only.
1. Select installation site, considering installed height is approximately 4".
2. Cut hole opening to 5 5/8" diameter.
3. Remove the trim ring by rotating clockwise.
4. To prepare the fixture for wiring, remove the single screw at the rear and remove the tray.
5. Wire fixture as per applicable codes, by qualified electricians only.
6. Direct the end of the housing thru the opening in the ceiling.
7. Check to assure there is NO flammable insulation/material that will contact the fixture.
8. Press the housing flange against the ceiling and center in the opening.
9. Install the fixture with a minimum of (3) #8 flathead screws (not provided).
10. Install lamp, and the trim ring by rotating counter-clockwise to engage clips.

Note: Not all trim ring options shown, as some may have colored, sealed or standoff lenses. Apply power, only if all electrical wiring has been completed and inspected.

STEP 1
