CAUTION: Read carefully before installing and wiring the luminaire. These instructions include information for installation in both hazardous and ordinary locations. Any warning or special instructions should be closely followed. Hazardous area installations should be done in accordance with article 500 and 501 of the NEC or CEC. Intended for vertical mounting. Check the ratings to ensure suitability for the area.

Must be installed in accordance with the NEC or CEC and all other applicable codes. All luminaires must be properly grounded. To reduce the risk of fire or explosion, do not install where the marked operating temperature exceeds the ignition temperature of the hazardous atmosphere. Disconnect the fixture from the supply circuit before opening. Keep tightly closed when in operation. These luminaires are provided with two 1/2"NPT or two 3/4"NPT outlet. Do not attempt to install this luminaire unless you are familiar with warnings, cautions and procedures outlined in this information sheet.

INSTALLATION & ELECTRICAL WIRING

WARNING: Risk of electrical shock hazard, only qualified personnel should conduct this procedure!

Do not make electrical connections with the power ON. Use cu or cu clad wire only, rated for 90°C.

1. Make (2) mounting holes per illustration below. Mount the junction box (0A) in its intended location with (2) minimum size 1/4" bolts (not provided).
2. Install conduit or fitting (not provided) into the junction box (0A) and assure a proper seal as per the manufacturers instructions.
3. Strip the supply cable(s) jacket (not provided) back approximately 3".
4. Strip the insulation of the supply wires back approximately 3/8".
5. Route cable thru conduit or fitting. Attach ground wire to the green screw (9D) in junction box (0A).
6. Using connectors rated 90°C, connect the hot wire to black and the neutral to the white wire.
7. Push connections inside junction box (0A).
8. Align the holes in socket plate (5A) with junction box (0A) holes. Install screws (9B) (qty 2, #8-32) in place and tighten approximately 10 in*lbs.

CAUTION: Note maximum lamp wattage rating as indicated on the luminaire. Exceeding this can cause over heating, premature failure and be dangerous. The lampholder is rated for a maximum of 250 volts. The voltage of the lamp must correspond with the supply voltage.

9. Install the proper wattage lamp (not provided) into the lampholder (4A), making sure the center contact of the lamp seats well into the lampholder.
10. Thread the glass globe (1C) clockwise into the junction box (0A), and tighten firmly by hand until the globe stops and seats well against the globe gasket (7A).
11. Thread the guard (2A) on clockwise and tighten firmly by hand. For cast guard, lock in position with set screw (9G).
