Installation & Maintenance Information

SAVING THESE INSTRUCTIONS FOR FUTURE REFERENCE

WARNING: Risk of electrical shock hazard, only qualified personnel should conduct this procedure. Do not make electrical connections with the power ON. Disconnect supply circuit at least 30 minutes before opening fixture for servicing and/or re-lamping. Refer to fixture nameplate for minimum supply wire rating.

1. Mount the fixture by the 'U' shaped bracket (6C) supplied using minimum two 5/8" diameter bolts (not provided). Select proper anchor and surface to support approximately 105 lbs. See mounting dimensions illustration below.
2. Unlatch all four (4) rear cover latches (5A) and open cover (6B). Avoid damaging the sealing gasket during installation and/or servicing.
3. Ensure Fixtures are supplied with 6 feet of 14/3 - 600VAC - SEOW cable (thermoplastic rubber jacket, oil resistant for outdoor use).
4. Close rear cover (6B) and securely close all four (4) latches (5A).
5. Unlatch all eight (8) lens frame latches (5B) and open the lens frame. Avoid damaging the sealing gasket during installation and/or servicing.
6. Loosen wing nuts (9A) and remove lamp support bracket (6A).
7. Verify that the Hi.D lamp complies with lamp specifications on fixture nameplate.
8. Install the proper wattage lamp (not provided) into the lampholder (4A), making sure the center contact of the lamp seats well into the lampholder.
9. Replace lamp support bracket (6A) and tighten wing nuts (9A).
10. Close lens frame and securely engage all eight (8) lens frame latches (5B).
