SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE

CAUTION: Read carefully before installing and wiring the receptacle. Any warning or special instructions should be closely followed. Check the ratings to insure suitability for the environment & supply. Must be installed in accordance with the NEC or CEC and all other applicable codes. All receptacles must be properly grounded. These devices are not suitable for hazardous locations.

INSTALLATION & ELECTRICAL WIRING

WARNING: Risk of electrical shock hazard, only qualified personnel should conduct this procedure! Do not make electrical connections with the power ON. Use cu or cu clad wire only. These units are provided with receptacles rated 20 amps, either 125 or 250 vac. Consideration to the number of receptacles installed on each line should be given when selecting cable size. Apply lubriant to all screws and threads during installation, failure to use can result in voiding warranty.

1. Locate and drill cable gland hole through the thickened area of the junction box (0A) per instructions furnished with cable gland (not provided). Clean all foreign material out of junction box.
2. Mount the junction box (0A) in its intended location using 1/4" bolts (not provided). See illustration below for mounting dimensions.
3. Cables should be stripped back approx. 6" - 10" to allow individual wires to flex.
4. Install cable glands (not provided) per instructions furnished with cable gland.
5. Route cable in through cable gland and secure seal on cable jacket.
6. Connect L1 (Hot) lead to the dark colored screw on the side of each receptacle (4A).
7. Connect L2 (Neutral) lead to the light colored screw on the side of each receptacle (4A).
8. Connect Green or earth wire to Green Ground screw (4B) on rear of each receptacle (4A).
9. Mount each receptacle (4A) to the cover (1A) with two #8 screws (9A).
10. Slip gasket (7A) over cover (1A) so it can be installed between the cover and junction box (0A).
11. Mount cover with #10 screws (9B) provided. Torque screws only enough to insure a good gasket seal (approx. 10-20 in.lbs).
