FLC SERIES
FLUORESCENT LUMINAIRES
Installation & Maintenance Information

SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE

CAUTION Read carefully before installing and wiring the luminaire. These instructions include information for installation in both standard and inside marine locations. Any warning or special instructions should be closely followed. All luminaires must be properly grounded. Must be installed in accordance with the NEC (National Electrical Code) and all other applicable codes.

Fixtures contain fluorescent ballast having extremely high voltage output. Disconnect the fixture from the supply circuit before opening. Keep closed when in operation. Do not attempt to install this luminaire unless you are familiar with warnings, cautions and procedures outlined in this information sheet.

INSTALLATION & ELECTRICAL WIRING

WARNING Risk of electrical shock hazard, only qualified personnel should conduct this procedure! Do not make electrical connections with the power ON. Refer to fixture nameplate for minimum supply wire wire rating. Installer must use proper electrical fittings to maintain dripproof integrity.

1. Remove fixture from carton, remove lens (2B) by loosening both endcap screws (9C).
2. Remove ballast cover (1C) by loosening screws (9D).
3. Mount fixture in its intended location using minimum 1/4" bolts (not provided).

See illustration below for mounting dimensions.

NOTE: This fixture is listed as "Marine Inside Type Drip-proof", consideration should be given when selecting cord grips to insure a drip-proof seal around the cable.

4. Drill cord grip hole through endcap (1B) per instructions furnished with cord grip (not provided).
5. Clean all foreign material.

CAUTION See product label for voltage input and amperage load per fixture. Use only approved electrical type splices. Route wires away from fluorescent ballast when feeding cables through fixture.

6. Cables should be stripped back approx. 6" - 10" to allow individual wires to flex.
7. Install cord grip (not provided) per instructions furnished with cord grip.
8. Route cable in through cord grip and secure seal on cable jacket.
9. Connect L1 (Hot) lead to the black fixture wire.
10. Connect L2 (Neutral) lead to the white fixture.
11. Connect Green or earth wire ground to the green wire.
12. Replace ballast cover (1C) with retaining screws (9D).
13. Replace lens (2B).
14. Reassemble endcap (1B) on each end.
