FDA / PARALLEL SERIES
FLUORESCENT LUMINAIRES
Installation & Maintenance Information

SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE

**CAUTION**
Read carefully before installing and wiring the luminaire. These instructions include information for installation in both standard and inside marine locations. Any warning or special instructions should be closely followed. All luminaires must be properly grounded. Must be installed in accordance with the NEC (National Electrical Code) and all other applicable codes.

**WARNING**
Risk of electrical shock hazard, only qualified personnel should conduct this procedure! Do not make electrical connections with the power ON. Refer to fixture nameplate for minimum supply wire rating.
The FDA Series fixtures are provided with one 1/2" NPT knock out thru top of housing. Installer must use proper electrical fittings to maintain drip proof integrity. The FDA Parallel Type is design for 300mm Suspended Ceiling System.

1. Review page 2, dimensional and orientation information for proper mounting.
2. Drill (2x) mounting holes for minimum 1/4" bolts through each suspension bracket (1A). Clean all foreign material.
3. Mount fixture to ceiling system track (3B) in its intended location using minimum 4x, 1/4" bolts, nuts & washers (not provided).

**NOTE:** This fixture is listed as "Marine Inside Type Drip-proof", consideration should be given when selecting cord grips to insure a drip-proof seal around the cable.
4. Remove screws (9D,2x) and washers (9E,2x). Disengage lens frame door (2B) from clips (2C).
5. Remove nuts (9F, 4x) and washers (9G,4x). Slide out reflector assembly (6A).
7. Select electrical fitting and route wires thru fitting and into fixture.

**CAUTION**
See product label for voltage input and amperage load per fixture. Use only approved electrical type splices. Route wires away from fluorescent ballast when feeding cables through fixture.
8. Connect wires to terminal block (4E):
   - Connect L1 or hot lead to black wire terminal.
   - Connect L2 or neutral to white wire terminal.
   - Connect ground wire to ground screw or green wire on back of reflector assembly (6A).
9. Replace reflector assembly (6A) and tighten nuts (9F,4x) and washers (9G,4x).
10. Install lamps.
11. Engage lens frame door (2B) to clips (2C) and tighten screws (9D,2x) and washers (9E,2x).

Under NO circumstance should the internal reflector be opened or remove during operation. Fixtures contain fluorescent ballast having extremely high voltage output. Disconnect the fixture from the supply circuit before opening. Keep closed when in operation. Do not attempt to install this luminaire unless you are familiar with warnings, cautions and procedures outlined in this information sheet.
1) Verify Ceiling Panel size (5A).

2) Fixture lens frame (4A) is 10.83” wide. Position fixture for lens frame (4A) to take the spacing of 1x Ceiling Panel (5A) (1” gap between Ceiling Panel will repeat between lens frame and Ceiling Panel).

3) Install fixture (1B) to Ceiling System Track (3B) using minimum 4x, 1/4” bolts, nuts & washers (not provided).

4) Return to Page 1 to complete installation and electrical wiring.
