FBR SERIES
FLUORESCENT LUMINAIRES
Installation & Maintenance Information

SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE

Read carefully before installing and wiring the luminaire. Check the ratings to insure suitability for the area. Must be installed in accordance with the NEC (National Electrical Code) and all other applicable codes. These luminaires are not suitable for hazardous locations.

INSTALLATION & ELECTRICAL WIRING

WARNING Risk of electrical shock hazard, only qualified personnel should conduct this procedure!

Do not make electrical connections with the power ON. Use cu or cu clad wire only, see product label for wire temperature rating. Optional convenience outlet is rated for 125 vac, maximum 15 amp.

1. Make (4) mounting holes for minimum #10 screws (not provided) per mounting dimensions below.

NOTE: This luminaire is for wall mount only.

2. Remove the end cover (0A) by loosening thumb screw (9A).
3. Carefully slide out lens (5A).
4. Remove reflector assembly (0C) by loosening #8 screws (9B) (qty. 2x, #8-32).
5. Remove knockout on back of housing and install fitting (not provided) to housing (0B).
6. Route supply cable (not provided) thru fitting and tighten securely.
7. Secure luminaire to wall with (4) minimum #10 screws (not provided).
8. Strip the supply cable(s) jacket back approximately 2".
Strip the insulation of ground and supply wires approximately 3/8".

WARNING See product label for voltage input and amperage load per fixture.

9. Make connections to terminal block (4C). Connect the L1 (hot) wire to black wire terminal. Connect L2 (neutral) to white wire terminal. Connect ground wire to green wire terminal. See wiring diagram.

10. Push all wires and connections inside housing (0B) area.
11. Carefully replace reflector assembly (0C) making sure wires are not pinch. Secure with #8 screws (9B) (qty. 2x, #8-32).

WARNING Use only fluorescent lamp to lampholder type and wattage rating indicated on the luminaire. Exceeding this can cause over heating, premature failure and be dangerous.

12. Install the proper wattage lamps (not provided) into the lampholders (4B).
13. Replace lens (5A).
14. Replace end cover (0A) and tighten thumb screw (9A).
15. Apply power and inspect for proper operation.
