F115 / F215 SERIES
FLUORESCENT LUMINAIRES
Installation & Maintenance Information

SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE

WARNING: Do not make electrical connections with the power ON. Use cu or cu clad wire only, see product label for wire temperature rating. Convenience outlet is rated for 125 vac (maximum 15 amp).

1. Make (2) mounting holes for minimum #10 screws (not provided) per mounting dimensions below.

NOTE: This luminaire is for wall mount only.

2. Remove lens cover (5A) by loosening thumb screws (9A) (qty.2x).

3. Remove reflector (0C) by loosening #8 screws and lock washers (9B) (qty.4x, #8-32).

4. Remove knockout on back of housing and install fitting (not provided) to housing (0B).

5. Route supply cable (not provided) thru fitting and tighten securely.

6. Secure housing (0B) to wall with (2) minimum #10 screws (not provided).

7. Strip the supply cable(s) jacket back approximately 2". Strip the insulation of ground and supply wires approximately 3/8".

WARNING: Risk of electrical shock hazard, only qualified personnel should conduct this procedure!

CAUTION: See product label for voltage input and amperage load per fixture.

8. Using connectors, connect the I.1 (hot) wire to black wire terminal. Connect I.2 (neutral) to white wire terminal. Connect ground wire to ground screw or green wire. See wiring diagram.

9. Push all wires and connections inside housing (0B) area.

10. Carefully replace reflector (0C) making sure wires are not pinch. Secure with #8 screws and lock washers (9B) (qty.4x, #8-32).

CAUTION: Maximum 15 watts Type F15T8 lamp for T8 Bi-Pin G13 socket. Exceeding this can cause over heating, premature failure and be dangerous.

11. Install the proper wattage lamps (not provided) into the lampholders (4B).

12. Replace lens cover (5A) and tighten thumb screws (9A) (qty.2x).

13. Apply power and inspect for proper operation.
