1440 & 1449 SERIES
INCANDESCENT LUMINAIRE
Installation & Maintenance Information

SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE

WARNING Read carefully before installing and wiring the luminaire. Any warning or special instructions should be closely followed. Must be installed in accordance with the NEC (National Electrical Code) and all other applicable codes. All luminaire must be properly grounded. These luminaires are not suitable for hazardous locations.

INSTALLATION & ELECTRICAL WIRING

WARNING Risk of electrical shock hazard, only qualified personnel should conduct this procedure! This luminaire is rated for maximum 250 Volts. Do not make electrical connections with the power ON. Use cu or cu clad wire only, see product label for maximum lamp wattage.

1. Make (4) mounting holes for minimum 1/4" bolts (not provided) per mounting dimensions below.
2. Mount housing (0A) in its intended location with (4) minimum size 1/4" bolts (not provided).
3. Drill housing (0A) for fitting (not provided) thru thickened areas (0B) of housing. Maximum holes size for 3/4" NPT fitting.
4. Install fitting (not provided) to housing (0A) and assure a proper seal as per the manufacturers instructions.
5. Open lens assembly (1C) by loosening each wing nuts (9M). Rotate wing nuts (9M) and disengage lens assembly.
6. Loosen screw and washer (9B) (qty.1x, #8-32). Remove reflector (2A).
7. Strip the supply cable(s) jacket (not provided) back approximately 4".
8. Route cable thru fitting cable gland.
9. Strip the insulation of the supply wires back approximately 3/8".

CAUTION See nameplate for voltage & frequency requirements!
10. Connect L1 or hot lead to terminal block (4A). Connect L2 or neutral to terminal block (4A). Connect ground wire across from green wire on terminal block (4A).
11. Pull out excess cable and tighten fitting cable gland to create a proper seal on the cable as per the manufacturers instructions.
12. Replace reflector (2A) and secure inside housing with screw and washer (9B) (qty.1x, #8-32).

CAUTION Use only incandescent lamp to lampholder type and wattage rating as indicated on the luminaire. Exceeding this can cause over heating, premature failure and be dangerous. The lampholder is rated for a maximum of 250 volts. The voltage of the lamp must correspond with the supply voltage.
13. Install the proper wattage lamp (not provided) into the lampholder, making sure the center contact of the lamp seats well into the lampholder (4B).
14. Close lens assembly (1C). Rotate wing nuts (9M) to engage lens assembly and tighten each wing nuts (9M).
