546 / 556 / 559 / 568 / 574 SERIES
WATERTIGHT JUNCTION BOXES
Installation & Wiring Information

SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE

Read carefully before installing and wiring. Any warning or special instructions should be closely followed. Check the ratings to ensure suitability for the environment & supply. Must be installed in accordance with the NEC or CEC and all other applicable codes. These junction boxes are not suitable for hazardous locations. All junction boxes must be properly grounded.

INSTALLATION & ELECTRICAL WIRING

Risk of electrical shock hazard; only qualified personnel should conduct this procedure! Do not make electrical connections with the power ON. Apply lubricant to all screws and threads during installation, failure to use can result in voiding warranty.

1. Locate and drill cable gland hole through the thickened area of the junction box (0A) per instructions furnished with cable gland (not provided). Clean all foreign material out of junction box.
2. Mount the junction box (0A) with mounting hardware (not provided). See illustration below for mounting dimensions.

3. Cables should be stripped back approx. 3”- 5” to allow individual wires to flex.
4. Install cable gland (not provided) to junction box (0A) per instructions furnished with cable gland.
5. Route cable in through cable gland and secure seal on cable jacket.

NOTE: Clean inside junction box and gasket surface free of debris prior to reassembly of cover. Verify that gasket cover (7A) was not damage and is in correct position.
7. Mount cover (1A) with screws (9A) provided. Torque screws only enough to insure a good gasket seal.

- 546/574 Models - Torque #10 screws (9A) to approx. 10-20 in#lbs.
- 556/559/568 Models - Torque 1/4” bolts (9A) to approx. 5 ft#lbs.
