CAUTION: Read carefully before installing and wiring the luminaire. These instructions include information for installation in both hazardous and standard locations. Any warning or special instructions should be closely followed. Hazardous area installations should be done in accordance with article 500 and 501 of the NEC. Check the ratings to assure suitability for the area. Must be installed in accordance with the NEC (National Electrical Code) or CEC (Canadian Electrical Code) and all other applicable codes. All luminaires must be properly grounded.

INSTALLATION & ELECTRICAL WIRING

WARNING: Risk of electrical shock hazard, only qualified personnel should conduct this procedure! Do not make electrical connections with the power ON. Disconnect supply circuit at least 30 minutes before opening fixture for servicing and/or re-lamping. Refer to fixture nameplate for minimum supply wire rating. See Emergency Battery Backup Ballast Instructions for fixture with EM option.

1. Mount the outer shell (1A) by the six (6x) 7/16" holes using the six (6x) 5/16" threaded rods (9A), nuts and washer (provided).

Note position of wireway (2A) thru bottom of outer shell.

See mounting dimensions illustration below.

2. Attach threaded fitting to 3/4" NPT coupling (5C) on housing (5A).

Fitting must be sufficiently tightened to produce a vapor-tight seal.

3. Mount fixture inside outer shell (1A) with 1/4" nuts and washers (9D, qty 4x) provided.

4. Route supply cable thru wireway hole (2A) in outer shell (1A) and thru fitting on housing.

5. Release all lens frame latches (6A) and open the lens frame (6B). Avoid damaging the sealing gasket during installation and/or servicing.

6. Remove screws and washers (7A, qty 4x) and reflector (8A).

7. Strip the supply cable(s) jacket (not provided) back.

8. Strip the insulation of the supply wires.

WARNING: See nameplate for voltage & frequency requirements!

See separate instruction sheets for fixture with optional emergency battery backup ballast. Fixtures may be provided with multi-voltage ballast, 120-277VAC 50/60Hz.

9. Connect L1 or hot lead to black wire. Connect L2 or neutral to the common white wire. Connect ground wire to green ground wire.

10. Pull excess supply wire out of housing and tighten fitting to supply cable.

11. Reinstall reflector (8A) with screws and washers (7A, qty 4x).

WARNING: Verify that the fluorescent lamps complies with lamp specifications on fixture nameplate.

12. Install the proper type & wattage lamps (not provided) into the lamp holder and rotate 90 degrees to lock into place, or simply depress spring loaded lamp holder.

13. Close lens frame and engage all lens frame latches (6A).

WARNING: Product must be used only with lens intact and all lens frame screws fully engaged. Replace cracked or damaged lens prior to use.

14. Close outer shell lens frame (1B). Secure in place with 1/4" screws (9B, qty 2x) and (9C).
