NRL80 / NRL86 / NRL96 SERIES
PLUGS AND RECEPTACLES
Installation & Wiring Information

SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE

CAUTION Read carefully before installing and wiring. Any warning or special instructions should be closely followed. Check the ratings to insure suitability for the environment & supply. Must be installed in accordance with the NEC or CEC and all other applicable codes.

INSTALLATION & ELECTRICAL WIRING

WARNING Risk of electrical shock hazard, only qualified personnel should conduct this procedure!
Do not make electrical connections with the power ON. Use cu or cu clad wire only. These devices are for operation on 125, 250 or 277 vac max. 15 or 20 amps, see marking on plug / connector / receptacle for voltage and current rating.

NRL80 - PLUG
1. Route supply cable (not provided) through ring (1B), through rubber boot (5A) and through wiring cover (2A).
2. Cable should be stripped back approx. 2" - 3" to allow individual wires to flex.
3. Strip the insulation of the supply wires back approximately 3/8".

See marking on plug for voltage and current rating.

4. Make electrical connections to plug (4B).
5. Place wiring cover (2A) over plug (4B) connections.
6. Tighten screws (9C).
7. Pull rubber boot (5A) inside ring (1B).
8. Push plug assembly inside rubber (5A).

NRL86 - CONNECTOR
1. Route supply cable (not provided) through ring (1B), through rubber boot (5A), through threaded ring (3A) and through wiring cover (2A).
2. Cable should be stripped back approx. 2" - 3" to allow individual wires to flex.
3. Strip the insulation of the supply wires back approximately 3/8".

See marking on connector for voltage and current rating.

4. Make electrical connections to connector (4C).
5. Place wiring cover (2A) over connector (4C).
6. Tighten screws (9C).
7. Pull rubber boot (5A) inside ring (1B).
8. Screw threaded ring (3A) inside ring (1B) and tighten against rubber boot (5A).

NRL96 - RECEPTACLE
1. Strip the insulation of the supply wires back approximately 3/8".

See marking on receptacle for voltage and current rating.

2. Make electrical connections to receptacle (4A).
3. Mount receptacle (4A) to cover (1A) with #6 screws (9B) provided.
4. Slip gasket (7A) over cover (1A) so it can be installed between the cover and junction box.
5. Mount cover and receptacle assembly to junction box with #6 screws (9A) provided.
