UNY and UNF unions – stainless steel

Applications:
UNY and UNF unions are installed in threaded thick wall conduit systems:
• UNY – to connect conduit to a conduit fitting, junction box or device enclosure
• UNF – to connect conduit to conduit, or to provide a means for future modification of the conduit system

Features:
UNY and UNF unions have:
• Compact design which permits assembly with a minimum of clearance to other adjacent conduit and/or equipment
• Strong and durable construction

Stainless steel benefits:
• Self-healing properties help reduce the penetration of rust/corrosion and eliminate damage to the fitting
• Retain strength in extreme heat and extreme cold conditions
• Surface is easy to maintain and keep clean
• Easy cleaning capabilities make these fittings perfect for food processing and other hygienic areas where wash downs are common
• Superior strength and durability greatly reduce replacement – this will lower your total cost of ownership and increase your return on investment
• Do not require harsh environment-damaging cleaners to keep them looking like new

Certifications and compliances:
NEC/CEC:
• Class I, Divisions 1 & 2, Groups A, B, C, D
• Class II, Division 1, Groups E, F, G
• Class II, Division 2, Groups F, G
• Class III
UL standard:
• UL1203
CSA standard:
• C22.2 No. 30

Standard material:
• 316 stainless steel

Standard finish:
• Passivated
