CAUTION

To prevent external fire or explosion, **DO NOT** connect to a supply circuit capable of delivering more than **10,000 RMS symmetrical amperes**. **DO NOT** install equipment which will produce external surface temperatures exceeding the ignition temperature of the flammable or combustible materials which may surround this enclosure. Circuit-interrupting devices, such as switches, relays and circuit breakers which may be installed in the enclosure, may fail electrically or mechanically unless they have been investigated and found suitable for operation in the hazardous locations involved.
