Test emergency lighting system for proper operation.
A. Turn on power to designated disconnect switch.
B. Turn on designated disconnect switch and battery power switch at fixture.
C. Press "Test" pushbutton switch and observe: "Power on" pilot light should be off.
One fluorescent lamp should be operating.

Note: If one fluorescent does not operate, allow battery to charge for 15 minutes or more then repeat test.

Battery pack will retain electrical energy even with battery power switch is in off position. Before removing or replacing battery pack in ballast housing, make sure that every wire lead termination is insulated to prevent electrical shock.

Warning
Every EVF2209 with emergency lighting feature must be in individually controlled through a maintained contact, two position, two circuit selector switch (not supplied with fixture) as illustrated in wiring diagram.

Use instruction sheet IF572 for wiring, relamping, ballast replacement and maintenance.
