**WARNING**
ONLY QUALIFIED PERSONNEL SHOULD PERFORM INSTALLATION.

TO AVOID ELECTRICAL SHOCK OR COMPONENT DAMAGE, DISCONNECT POWER BEFORE ATTEMPTING INSTALLATION OF THE LIGHT FIXTURE.

Failure to install the unit in accordance with the National Electrical Code (NEC), all applicable Federal, State and local codes as well as Underwriter’s Laboratories (UL) safety standards for the installation, location and application may cause serious personal injury, death, property damage and/or product malfunction.

These Instructions are guidelines for the installation of Light Emitting Diode (LED) fixtures. Installation may vary depending on the application. Licensed electricians should provide all installation services requiring connection to a power source.

**CAUTION**
To retain seal integrity (and preserve warranty) do not loosen or remove the clamp holding the light assembly together.

**NOTE**
- Removal or loosening of the clamp will void all warranties
- Obstruction Lights - Do not mount this light assembly upside-down
- Visual Signals - Any mounting orientation is allowable
- The light will not meet necessary FAA specifications if mounted incorrectly

**INSTALLATION**

1. The dual wire housing [2] has a 1" NPT (3/4" bushing) end to be assembled to conduit
   - Use a 1-1/2" wrench to tighten and attach the wire housing [2] to the conduit
   - Tighten the 1/4 screw to secure the dual wire housing in position
   - Remove reducing bushing [5] if threading into 1" NPT conduit
2. Feed the supply wires through the conduit and dual wire housing [2] leaving approx 6" of wire for termination inside the wire housing [2]
3. Electrically connect the supply wires to the light assembly [1] wires
   - Connect the light assembly wire (with voltage label) to the Hot AC line
   - Connect the light assembly wire [without label] to the Neutral AC line
   - Connect the grounding wire [from green screw] to the Ground line
4. Tuck the connected wires inside the dual wire housing [2]
6. Restore power and verify operation
