Occupancy Sensor
Champ PVM LED Family
Installation & Maintenance Information
IF 1675

APPLICATION
Occupancy sensor kit for Champ Pro series industrial LED Luminaire.

- Suitable for ordinary locations only
- Suitable for wet locations, IP65, indoor use only

WARNING
To avoid electric shock:
Be certain electrical power is OFF before and during installation and maintenance.
Luminaire must be supplied by a wiring system with an equipment grounding conductor.
To avoid burning hands:
Make sure luminaire lens and housing are cool when installing occupancy sensor and performing maintenance.

APPLICATION
To avoid product degradation:
Make sure the wire supply voltage is the same as the occupancy sensor supply
Do not operate in ambient temperatures above those indicated on the luminaire nameplate.
Use proper supply wiring as specified on the luminaire nameplate.

INSTALLATION
Lens Installation
1. Refer to Wattstopper instruction sheet for adjusting sensor settings.
2. Remove tightening ring and gasket from occupancy sensor.
3. Place lens in the occupancy sensor.
4. Replace gasket and securely tighten tightening ring as shown in sensor assembly drawing.

5. Securely thread cover module onto nipple.
6. Tighten set screw located on interior of cover module.

Ceiling Mount Gland
1. Remove luminaire. Refer to Figure E and F.
2. For 1” and ¾” NPT: Securely thread reducer to entry of the top hat and securely thread cord grip to reducer. For ½” NPT: Securely thread gland to top hat entry.

Ceiling Mount Gland (Figure D)

PENDANT MOUNTING
Refer to Luminaire for assembly illustration
1. Remove Champ fixture from top hat, disconnect field wiring, and remove cover module from conduit.
2. Securely thread T onto conduit.
3. For 1” and ¾” NPT: Securely thread reducer to horizontal entry of T. Securely thread cord grip to reducer. For ½” NPT: Securely thread cord grip gland to T.
4. Securely thread nipple to remaining T entry.
WIRING

1. Hang luminaire from cover module.
2. Pull occupancy sensor wires and field wiring through the cord grip and cover module.
3. Attach wire extensions to field wiring using wiring nuts.
4. Wire occupancy sensor as per wiring diagram.
5. Tighten cord grip.
6. Close the driver housing onto the cover module, making sure that all wires are safely inside the driver housing. Tighten captive closing screw to 30 in.-lbs. (3.4 N-m).
7. Turn power on.

120/277V

347V

480V
