Chico® LiquidSeal Mixing Instructions

1. Warm package above 0°C (32°F) before using.
2. Clean and dry surfaces.
3. Roll up bottom end of Flex-Pack and sleeve (opposite discharge tube/channel) and press down to burst seal between Part 1 & 2. Take care not to burst seal between resin and discharge tube/channel.
4. Run the Flex-Pack sleeve back and forth from end to end over the edge of a bench approximately 40-50 times or 20-25 back and forth cycles with mild pressure.
5. If you see striations or non-uniform color, mix an additional 10-15 cycles.
6. Roll up the Flex-Pack from the bottom and press down to burst the seal between the resin and the discharge tube/channel and squeeze out the mixed contents.
