TGC40
CABLE TRAY GROUNDING CLAMP

Installation and Maintenance Information
IF947  6/83

APPLICATION
Type TGC40 cable tray grounding clamps are used to securely clamp a grounding or bonding conductor to cable tray side rails.

The TGC40 clamp insures grounding continuity of the tray assembly when installed in compliance with Section 318-6 of the National Electrical Code® and any other applicable codes up to the maximum size grounding conductor marked on the TGC40 clamp.

INSTALLATION
1. Locate clamp body on the tray flange at least three inches from end of cable tray section as shown in Figure 1.

2. Holding clamp on the cable tray, tighten clamping screw securely until tray material deforms slightly (150 in. lb. torque).

3. Install grounding or bonding conductor into clamp and tighten pressure connector cap screw with Allen wrench to firmly grip conductor.

CAUTION
Use only copper, copper-clad aluminum or aluminum conductors sized in accordance with Section 250-79 of National Electrical Code.
