

Opportunity At-A-Glance

COOPER Crouse-Hinds

Cooper Crouse-Hinds® Fiberglass Enclosures

will hold up under the most extreme conditions and provide protection in adverse environments such as water, steam, vapor or chemicals.

Cooper Crouse-Hinds Fiberglass Enclosures

- Setting the standard with safe, reliable electrical products that provide superior performance
- Delivering safety and productivity you can use every day

Fiberglass Enclosures offer customers:

- An extensive selection of durable industrial non-metallic products that deliver superior performance and provide a wide range of options to meet any customer preference
- Low maintenance choices, like durable non-metallic enclosures with features designed to provide superior protection in the harshest environments
- Dedicated and expert sales support to help select products that perform reliably and cost effectively

Cooper Crouse-Hinds is helping more industrial facility owners, operators and engineers succeed each day – safely and cost effectively. It's part of our commitment to focus on industries where our experience, expertise and products can make the biggest impact.

Fiberglass Enclosures are:

- Lighter and easier to handle
- Strong enough to hold up under extreme conditions
- Equal to stainless steel in corrosion and chemical resistance, and far better than carbon steel
- Non-conductive (an electrical insulator rather than electrical conductor)
- Easier to punch, drill or saw
- Less expensive to ship
