

Quick connect AC/MC outlet box solutions

Standard option

Choose from our popular 4" square boxes or switch boxes, complete with ground screw and pigtail for quick installation.

Benefits:

- TP431MSBPF includes a self-supported stud bracket and far side support clip, internal MC clamps, pry-outs and pigtail lead
- If desired, the outer portion of the MSB bracket can be snipped on the score line to become a standard face bracket
- TP431PF and switch boxes TP178PF, TP179PF and TP184PF include internal MC clamps, pry-outs and pigtail lead
- Internal MC clamps are rated and listed for use with AC/MC, HCF and MCAP™ type cable, and offer quick and easy MC cable re-work

Installation:

- Pry-outs are conveniently located at the top and bottom of each box to ensure a perfect cable entry on center
- Insert cable and tighten set screw

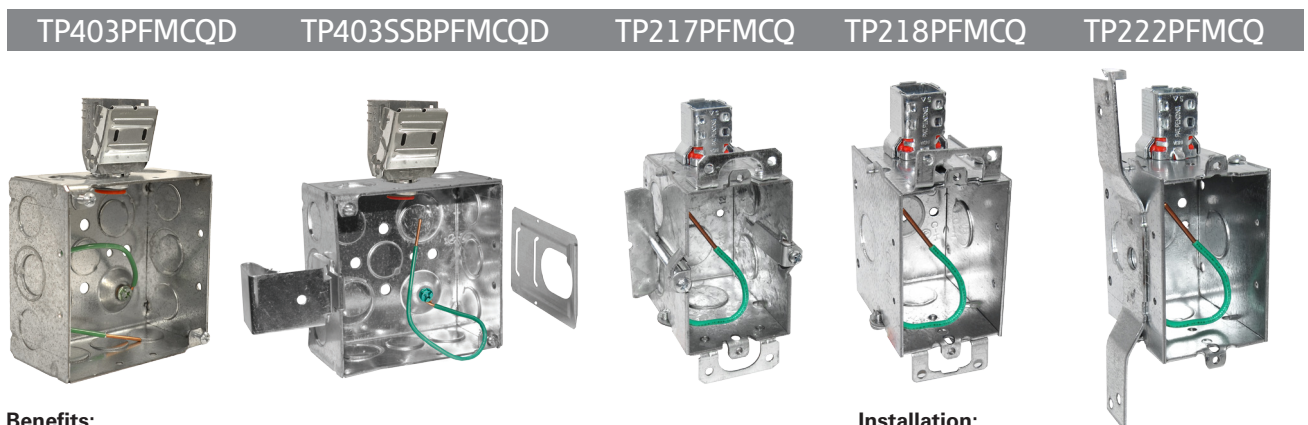

Rework/adjustment:

- If re-work is required, slightly turn the set screw on the MC clamp to install the cable or to back it out
- No need to remove internal clamp, just loosen and tighten

PRE-formance option

The quickest way to install MC cable into a 4" square box or switch box, complete with the labor saving Quick-Lok™ Pro connector, ground screw and pigtail.

Benefits:

- PRE-formance™ assemblies provide more wiring room inside of the box
- No prying out required, as Quick-Lok Pro connectors are pre-installed
- Quick-Lok Pro connectors are UL Listed for use with a variety of AC/MC cable, including MC-PCS which is often used for lighting controls
- Built-in anti-short bushing

Installation:

- Simply push MC cable through the pre-installed Quick-Lok Pro connectors
