Industrial lighting
V-Spring® telescoping safety light pole

Increase safety and decrease labor costs
Designed for safety.

Whether it's a new installation or a replacement project, lighting maintenance tasks can be dangerous, labor intensive and costly.

Make your job safer, faster and easier with V-Spring telescoping light poles.

The new, patent-pending V-Spring telescoping light pole from Eaton’s Crouse-Hinds increases safety and decreases labor costs associated with lighting installation and routine maintenance.

Its innovative design allows for all work to safely take place on the platform or walkway, eliminating the need for portable ladders and fall protection equipment.

**Application**
- For luminaires installed on industrial walkways, platforms, stairways and conveyors where OSHA/HSE regulations require fall prevention equipment
- Hard to reach or dangerous areas where safety is a big concern
- Hazardous and harsh environments subject to corrosive agents, vibration and extreme temperatures

Install and maintain light fixtures without leaving the ground.
Product specifications

Construction
- Telescoping
- Factory sealed and pre-wired

Installed height
- Adjustable raised height

Certifications
- UL1598
- CSA C22.2 No. 250.0-08
- cULus listed for Class I, Division 2, Class II, Division 2 when used with Champ® series luminaires

Environmental ratings
- Dusttight
- NEMA 4, IP66
- Wind rated to 230 mph per AASHTO standards

Vibration
- DNV No. 2.4: 2006
- IEC 60068-2-6: 2007

Materials

Light pole options
- Structural steel: A36-500
- Hot dip galvanized: ASTM 123
- Aluminum: T6061
- Stainless steel: 316 grade

Compression spring
- Stainless steel

Hardware
- Xylan 1400 coated for corrosion protection

Cable
- 12/3 AWG UL/CSA Listed
- 600V, -40°C to 105°C
- Sun- and oil-resistant, FT1, FT2
- ROHS II Reach

Weather cover
- 60 Duro high UV-resistant EPDM

Weights

Handrail stanchion and wall models:
- Structural steel: 42 lbs.
- Aluminum: 23 lbs.

Base/structural model:
- Structural steel: 70 lbs.
- Aluminum: 34 lbs.

Maximum luminaire weight
- 50 lbs. (recommended weight for one person operation)

Easy fixture orientation
- Adjustable 360° pole rotation allows for effortless positioning of light

Simple vertical travel
- Easily extend to any raised height – one product covers multiple mounting heights
- Luminaire housing will not fall from mounting module hinge hook during installation or maintenance
- No pinch points – protects hands and fingers
- Less force exerted on handrail

Simple operation
- Innovative design eliminates consideration of surrounding obstructions
- Telescoping design allows for safe transport on job site
- Easily adjust fixture position from ground or walkway

Designed for harsh environments
- Classified and hazardous locations
- No lubricants or maintenance required
- Rated for corrosive, wet, dusty, hot and cold conditions prior to use of optional harsh environment cover

Rugged construction
- 2" bottom pole for higher structural wind ratings
- Internal conduit for cable protection and moisture resistance

Fully assembled and wired
- Factory assembled wired and sealed for maximum environmental protection
- Reduces installation time
Safety by design

Maintaining lighting in industrial facilities is often a complex and costly task, as the majority of the fixtures are in dangerous and difficult to reach locations. For lights in elevated locations, OSHA/HSE regulations require fall prevention equipment any time a worker is exposed to a fall of six feet or greater.

While personal protection equipment will help protect workers from threat, there is still a risk of injury from a fall. Preventing the worker from being exposed to the threat altogether is the most effective risk-reduction measure.

Transition from protecting the worker to eliminating the risk.

All work takes place on the ground
- Spring assistance allows the luminaire to be lowered safely and easily – eliminating the need for portable ladders and fall prevention equipment.

Vertical travel reduces force and stress
- When compared to 45 degree lowering systems, the V-Spring’s spring assisted vertical movement requires 65% less force to raise or lower and removes mechanical stress on the handrail by over 300%.

Luminaire housing will not fall
- The vertical travel of the V-Spring allows the luminaire housing to properly hang from the mounting module hinge during installation and maintenance. No risk of dropped or falling ballasts.

No pinch points
- The V-Spring locking collar has no rotating parts during operation, protecting hands and fingers from injury.

The only pole replacement solution listed for classified and hazardous locations.

Replacement made easy
If you are looking to upgrade your facility’s lighting technology, use the V-Spring telescoping pole as a labor-saving installation tool. With our pole removal tool, the V-Spring can easily replace existing lighting systems, allowing you to quickly and safely install your new luminaires from the ground.

Replacement labor costs can be reduced by 30-50% with this approach, as the high cost of working at heights is avoided.

As an added benefit, the V-Spring will deliver additional labor savings from ongoing inspection and maintenance of the luminaire throughout its life cycle!

Complete pole replacement ensures structural integrity!

Installation options

**Inclined rail mount**

MHK-RI

**Material**
- G Galvanized steel
- S Stainless steel

**Base mount**

- 14" square base plate
- 1" NPT pipe thread (cable entry)
- "J" bolts for concrete backplate not included

**Column/wall mount**

**Universal rail mount - tubular rail**

MHK-RT

**Material**
- G Galvanized steel
- S Stainless steel

**Universal rail mount - angular**

MHK-RA

**Material**
- G Galvanized steel
- S Stainless steel

**Bolt-on (weld-less) brackets provided as a complete kit**

**NOTE:**
All mounting hardware for base and wall are included with pole.
Wall mount bracket included (MHK-WG)
