HALO HOME™
Simple. Secure. Smart.
Wirelessly control lights from anywhere in your home

eaton.com/HaloHome
Smart lighting is the new standard.
HALO Home is a flexible new approach to smart home lighting. Our system offers a range of Bluetooth® fixtures, controls and accessories that work seamlessly together. From a single light to an entire home, your smart lighting search starts and ends here.
Smart lighting solutions for the whole home

Today, homeowners expect lighting that fits their lifestyle. The HALO Home system lets you easily build a lighting plan that meets your needs by enhancing home security, energy savings and aesthetics. No internet or hub required.

Set the scene
Access lights via the HALO Home app on a smart device, with options for dimming, color adjustment, on/off functions and automatic scheduling.

Save energy
With the ability to group, dim, and schedule an entire home’s lighting, HALO Home helps cut back on wasted energy and money.

Boost security
A well-lit home is a safer home. With HALO Home, customers can time their indoor and outdoor lighting to automatically turn on when they need it, with full control from anywhere with the Internet Access Bridge.

Simple. Secure. Smart.

Take control

A range of control options to suit your project.

HALO Home offers lots of control options – from Bluetooth in-wall wired switches to Bluetooth-enabled wireless “anyplace” controls, user-friendly mobile apps, web application, or all of the above. No internet connection or hub is required to get started; you can easily configure the lights using Bluetooth connection and any smart device. For customers who want on-the-go control and Amazon Alexa* compatibility, there’s the option to connect the Internet Access Bridge.

*Pair with Amazon Alexa for voice control or access your lights remotely from anywhere with the Internet Access Bridge (sold separately) by using your mobile device or web browser.

HALO Home app
Our user-friendly mobile app lets you control lighting from your fingertips, and from anywhere in the world (with the optional Internet Access Bridge). Available for iOS and Android, it features dimming, adjustable white tuning, and automatic scheduling.

Bluetooth mesh
Rest assured knowing HALO Home’s devices are communicating securely. Advanced Bluetooth mesh technology provides for a secure, simple wireless connectivity.

Voice control compatible
Customized home lighting, on-command. HALO Home is compatible with Amazon Echo/Alexa products, when using the optional Internet Access Bridge.

Flexible and scalable
HALO Home is a simple and flexible connected option, with the ability to install as little as one smart light or scale up to control the entire home through the easy-to-use HALO Home app for iOS or Android.

Easy installation
HALO Home connected LED light fixtures are easy to install, and ready to connect to an entire smart lighting system out-of-the-box.

White tuning
The HALO Home smart light fixtures provide the ability to adjust color temperatures (2700K-5000K) throughout the day or set to a desired state.

Smarter lighting control at your fingertips

The days of walking across the room to turn on a light are long gone. You can do this (and much more) from your phone, with our easy-to-use mobile app for iOS and Android.

No internet or hub is needed to get started. The app saves the user’s preferences and settings to their device, so programming goes off without a hitch -- with or without the Internet, or even having the phone nearby.

And for those who want to control it all from anywhere, there’s the Internet Access Bridge. This allows for global access and 24/7 clock synchronization via the home's wireless network and the option to add voice control with Amazon Alexa.
On / Off
Who hasn’t started backing out the driveway, only to realize they accidentally left the lights on? Now, turning lights on and off throughout the home is as easy as pulling up a mobile app.

Dimmable
Set the mood, while saving energy and money. HALO Home’s dimming features help cut energy costs, and extend the life of LED bulbs.

Groups
Group lights by room to control the entire room’s lighting at once. You can choose which lights are grouped together, and change those groupings at any time.

Scenes
Different occasions call for different lighting. Whether it’s getting ready for work, prepping for dinner, or winding down for movie night, you can customize settings around your schedule.

White Tuning
The right light color can complement a home beautifully. You can find the perfect setting, with color adjustment from 2700K (warm) to 5000K (cool) from the app.

Countdown Timers
Program a countdown to turn the lights on, off or flash.

Schedules
Program lights to automatically turn on or off even when your phone is off or out of range.

Random and Vacation Schedules
Lights will turn on and off randomly at different times, making the home look lived in even when you are away. It’s just one of the ways HALO Home enhances security.

Sunrise and Sunset Schedules
Lights can be programmed to turn on and off automatically, according to actual dusk and dawn times in your area. It even updates automatically as the seasons change.
HALO Home connected LED light fixtures are easy to install, and ready to connect to an entire smart lighting system out-of-the-box. Our versatile downlight options are perfect for virtually anywhere indoors, and our outdoor fixtures offer enhanced security and endless customized options.

Features

**Dimmable**
Adjust the brightness down to 5% using the HALO Home Anyplace dimmer switch, or the app.

**White tuning**
Homeowners can cast their home in its best light. Use the app to adjust color temperature from 2700K (warm) to 5000K (cool). The light will maintain 90 CRI throughout color adjustment. Factory defaults to 3000K.

**Groups**
Our fixtures are made to work together. They can be easily grouped and controlled, using the HALO Home mobile app.

**Schedules**
Make your lighting work with your schedule, automatically. Use the app to schedule individual lights or groups of lights.

HALO Home RL Smart LED Downlight
Wirelessly control Smart LED Downlight using HALO Home mobile application.

catalog number:
