**10-10V Dimming Zone Note:**
The 0-10V dimming zones within the Room Controller can be wired and controlled independently of the connected loads. This allows each load to have a dedicated 0-10V dimming zone or a single load to have up to three 0-10V dimming zones.

---

**Room Controller and Smart Devices use Quick Connect Technology:**
The RC30 will automatically recognize any smart device connected with the quick connect cable (provided) and start working immediately upon power up with no programming required.
The RC30 defaults to Manual On/Automatic Off vacancy sensor mode for maximum energy savings. Office stations provide On/Off control of the Yellow, Red and Purple loads as well as manual Raised/Lowered of all dimmers.
The daylight sensor will automatically reduce power up provide multi-zone daylight dimming in the space, remote adjustment can be made later.
*Refer to Room Controller website for more information on other integral co programming requiredbenefits like Daylight Depression, Schedule Control, Egress Control, BAS Output, Alert Mode, Emergency Lighting Control, and Slider Stations.*
