Emergency Lighting Load (Trims with normal lighting YELLOW lead): 

- Yellow: Emergency Power Cut
- Red: Lighting Load 1
- Purple: Lighting Load 2
- Blue: Lighting Load 3

- Requires 0-10V dimming ballasts

Room Controller and Smart Devices use Click & Go technology:
The RC06 will automatically recognize any smart device connected with the quick connect cable (provided) and start working immediately upon power up with no programming required.
The RC06 defaults to Manual On/Automatic Off vacancy sensor mode for maximum energy savings. Office systems provide On/Off control of the Yellow, Red, and Purple loads as well as manual Raise/Lower of all dimmers.
The daylight sensor will automatically turn lights off when light levels exceed those set for occupancy or after 2 hours of no occupancy and all non-occupancy levels.
