
Lighting Load (1): Away from window

Lighting Load (2): Near window

Lighting Load (3): Under cabinet

*Required 6-55 watt bulb for lighting load

Room Controller and Smart Devices use Click & Go Technology:
The RC306 will automatically recognize any smart device connected with the quick connect cable (provided) and start working immediately upon power up with no programming required.
The RC306 defaults to Manual On/Automatic Off vacancy sensor mode for maximum energy savings. Office stations provide DofOF control of the yellow, red and purple loads as well as manual Raise/Lower of all dimmers.
The daylight sensor will automatically turn lights on or off when daylight is in the space. Remote dimmers can also be used to adjust daylight dimming in the space. (remote adjustments can be made later)
*Refer to Room Controller website for more detailed summaries of the benefits of Demand Response, Occupancy Control, Egress Control, BMS Output, Alert Mode, Emergency Lighting Control, and Slider Stations.
