Receptacle Rated Switchpack

Overview
The Receptacle Rated Switchpack includes a 20A relay for ON/OFF control of connected outlets. The Receptacle Rated Switchpack connects to the Greengate Room Controller, DLVP power module, or any standard Greengate Occupancy Sensor. The Receptacle Rated Switchpack provides energy efficient control of receptacles.

Features
- Pre-terminated control cable ready with RJ45 ports eliminate wiring errors
- Capable of switching up to 20 Amps
- Suitable for plenum installations
- Rated for ballast, tungsten and motor loads
- Mounts directly to junction box

Description/Operation

The Receptacle Rated Switchpack operates on 120 volts and is a Class 2 connection to the Room Controller, DLVP power module, or standard occupancy sensors. Upon power up, Receptacle Rated Switchpack automatically recognizes its connection to a Room Controller or DLVP power module and begins the most energy-efficient operation. The receptacle rated switchpack will control connected receptacles On and Off in response to input from the Room Controller, DLVP power module, or standard occupancy sensors.

Installation

Low-voltage devices are connected using provided pre-terminated control cables (ordered separately).

Wiring Diagrams

INPUT VOLTAGE:
120 VAC, 50/60Hz.

CONTACT RATINGS:
20A 120/277 VAC STANDARD BALLAST
16A 120/277 VAC ELECTRONIC BALLAST
1.5 HP @ 120 VAC MOTOR

CAUTION: Before installing or performing any service on a Greengate system, the power MUST be turned off at the branch circuit breaker.

Mounting

All line voltage connections are made via pigtails with twist-on wire connectors.

Note: Connect the black supply lead to the power source.
