PREMIUM TGIC POLYESTER POWDER COATS

Invue and McGraw-Edison's premium polyester powder coatings are ultra-weatherable enhanced TGIC based coatings formulated to withstand extended outdoor exposure. The powders are designed not only to be functional but decorative, combining good film appearance with excellent mechanical and exterior exposure qualities. Formulated with properties similar to a standard TGIC, the improved weathering characteristics of premium TGIC result from the integration of a new polyester resin technology. The resin contains carboxyl functional groups, which undergo a reaction with the TGIC curing agent providing improved durability characteristics. These coatings consistently display at least twice the gloss retention of standard TGIC materials in both weatherometer and QUV testing, making them ideal for outdoor lighting fixtures and poles.
