

ALL-PRO

RECESSED LIGHTING
THE ALL-PRO ADVANTAGE

ALL-PRO

ALL-PRO housings and trims are available in a variety of sizes ideal for any room of the house. Different style trims provide almost any desired lighting effect.

ALL-PRO housings are available to solve special lighting situations such as sloped ceilings. These housings allow the light to be aimed straight down regardless of ceiling pitch.

TABLE OF CONTENTS

The All Pro Advantage.....	4-7
4" Line Voltage Housings and Trims	8-13
4" Low Voltage Housings and Trims	14-19
5" Housings and Trims	20-29
6" IC Housings and Trims	30-41
6" Non IC Housings and Trims.....	42-53
6" IC "Universal" Housings and Trims	54-64
6" IC Shallow Ceiling Housings and Trims.....	65-71
6" Non-IC Shallow Ceiling Housings and Trims.....	72-77
6" Slope Ceiling Housings and Trims.....	78-81
Numerical Index.....	82

Conserve heating and air conditioning costs by using IC rated ALL-PRO housings that maintain an unbroken insulation barrier. IC AIR-TITE housings and trims also minimize drafts and prevent moisture damage in unconditioned attic spaces.

ALL-PRO remodel housings can be installed from below the ceiling in existing ceilings. Cut a hole in the ceiling using the template provided, bring power to fixture with flexible cable, make wiring connections and install housing.

ALL-PRO new construction housings are designed for installation in new construction or in existing ceilings where there is access above the ceiling. Hanger bars include a pre-installed nail and junction boxes are equipped with push-in wire connectors to simplify installation.

ALL-PRO

THE ALL-PRO ADVANTAGE

Full Line of Housings

- 4", 5", 6" Aperture Sizes
- AIR-TITE™
- Remodel
- Non-IC
- Shallow Ceiling
- New Construction
- Slope Ceiling
- Insulated Ceiling
- "No-Bracket-Bracket"
- Low Voltage

ALL-NAIL Bar Hanger

- Bar hangers have pre-installed nails.
- Bar hangers are pre-installed on housings.
- Integral T-Grid ceiling clip - No additional clips needed.
- Bar hangers can be re-oriented 90°.
- Bar hangers can be shortened without tools.

THE ALL-PRO ADVANTAGE

Locking Screw & Multiple Crimp Points

- Patented regressed screw locks hanger bars in position - regressed design does not interfere with ceiling material.
- Screw can be tightened with slotted or phillips screwdriver or nut driver.
- Five bar hanger locking points on the housing allow the downlight to stay in place during drywalling.

Push-In Wire Connectors

- Push-in wire connectors speed installation - simply strip and insert supply wires into connectors. No additional wire nuts are required.
- Standard on every ALL-PRO housing.
- Integral wire traps for non-metallic sheathed cable - no additional connectors necessary.
- Knockouts for metallic cable and rigid conduit connectors.
- Rated for through branch circuit wiring.

ALL-PRO

THE ALL-PRO ADVANTAGE

airtite™

COOPER Lighting

LISTINGS AND CODES

- ALL-PRO housings and trims are UL and cUL listed in appropriate categories
- Wide choice of AIR-TITE housings and trims to meet state codes as qualified per test standard ASTM-E283.
- Meets AIR-TITE Code standards of:
 - California Title 24
 - IEEC
 - New York - ECC
 - Washington State EC
- ALL-PRO housings and trims are part of the Cooper Lighting family of products

“No-Socket-Bracket” System

- “No-Socket-Bracket” housings and socket supporting trims speed installation of multiple units.
- Provides consistent lamp position in multiple units.

THE ALL-PRO ADVANTAGE

Wide Trim Selection

- Trim retention system choices include:
 - Torsion springs - Friction clips - Coil springs
- Many trims available in choice of torsion springs or friction clips.

Contractor Friendly Trim Rings

- All-Pro trims feature an extra wide trim ring.
- Helps hide any cutout irregularities.
- ERT707 and ERT709 trims in white and black baffle include both narrow style and wide style trim ring - use one, discard the other.

High Gloss Appliance White Finish

- Fingerprints don't show.
- Easy to clean.
- Matches appliances.
- Matches electrical devices - wall plates, switches etc.

ET400

4" Aperture

Non-IC Housing
for Use In
Uninsulated
Ceilings

Any Insulation
Present Must Be
Kept 3" From
Housing

The ET400 is designed for use with small aperture trims. The shallow height allows it to be used in spaces where vertical height is limited. The ET400 can be installed in new construction or where there is access above the ceiling.

Housing: Die-stamped 20 gauge CRS with gray powder coat finish.

Plaster Frame: Housing is secured in plaster frame with spring barbs. The housing can be adjusted in the plaster frame to adjust for different ceiling materials. The housing can be removed from the plaster frame to provide access to the junction box.

Junction Box: Listed for through branch circuit wiring. Positioned to accommodate straight conduit runs. Four conduit knockouts are uniform 1/2" size with true pryout slots. Four "NM" (non-metallic) cable pryouts with integral strain relief also included. Quick-connect wiring connectors included.

Bar Hangers: Pre-installed, captive bar hangers allow housing to be positioned at any point within a 24" joist span. Score lines provided for easy shortening for 12" joists. Integral nail simplifies installation. Bar hangers can be repositioned 90°. Integral T-bar clip snaps onto T-bar spline for quick alignment.

Socket: Fixed position porcelain socket with nickel plated brass screw shell provides consistent lamp positioning. Shipping insert protects socket from overspray.

Thermal Protector: Self resetting thermal protector deactivates fixture if overheating occurs due to improper lamping or misapplied insulation.

 - UL/cUL Listed for FeedThrough
 - IP rated for select trims

ET400R

4" Aperture

Non-IC Housing
for Use In
Uninsulated
Ceilings

Any Insulation
Present Must Be
Kept 3" From
Housing

The ET400 is designed for use with small aperture trims. The shallow height allows it to be used in spaces where vertical height is limited. The ET400R can be installed from below the ceiling.

Housing: Die-stamped 20 gauge CRS with gray powder coat finish.

Junction Box: Listed for through branch circuit wiring. Seven conduit knockouts are uniform 1/2" size with true pryout slots. Four "NM" (non-metallic) cable pryouts with integral strain relief also included. Quick-connect wiring connectors included.

Socket: Fixed position porcelain socket with nickel plated brass screw shell provides consistent lamp positioning. Shipping insert protects socket against overspray

Remodel Clips: Four remodel clips secure housing and accommodate 1/2" and 5/8" ceiling thickness.

Thermal Protector: Self resetting thermal protector deactivates fixture if overheating occurs due to improper lamping or misapplied insulation.

EI400AT

4" Aperture
IC AIR-TITE
Housing for
Insulated
Ceilings

The EI400AT is a small aperture housing for providing accent and task lighting. The EI400AT is designed for use in insulated ceilings where it will be in direct contact with insulation. It is an AIR-TITE housing designed to prevent air flow between living spaces and unconditioned attic areas.

Housing: Double wall aluminum construction helps dissipate heat. Housing is secured in plaster frame with spring barbs. The inner housing can be adjusted in the plaster frame to compensate for different ceiling materials.

Plaster Frame: Galvanized steel construction. The inner housing can be removed from the plaster frame to provide access to the junction box. Plaster frame includes locking screws for hanger bars and cutouts for crimping hanger bars in position.

Junction Box: Listed for through branch circuit wiring. Positioned to accommodate straight conduit runs. Seven conduit knockouts are uniform 1/2" size with true pryout slots. Four "NM" (non-metallic) cable pryouts with integral strain relief also included. Quick-connect wiring connectors included.

Bar Hangers: Pre-installed, captive bar hangers allow housing to be positioned at any point within a 24" joist span. Score lines provided for easy shortening for 12" joists. Integral nail simplifies installation. Bar hangers can be repositioned 90°. Integral T-bar clip snaps onto T-bar spline for quick alignment.

Socket: Fixed position porcelain socket with nickel plated brass screw shell provides consistent lamp positioning. Shipping insert protects socket from overspray.

Thermal Protector: Self resetting thermal protector deactivates fixture if overheating occurs due to improper lamping.

Labels:

- UL/cUL Listed for Damp Location

12V Low Voltage
MR16 Lamp

The ET400LV is a small aperture low voltage housing for providing accent and task lighting. The ET400LV is designed for use in non-insulated ceiling or for insulated ceilings but insulation must be kept 3" from all sides of the housing.

Housing: Die-stamped 20 gauge CRS with gray powder coat finish.

Plaster Frame: Housing is secured in plaster frame with spring barbs. The housing can be adjusted in the plaster frame to adjust for different ceiling materials. The housing can be removed from the plaster frame to provide access to the junction box.

Junction Box: Listed for through branch circuit wiring. Positioned to accommodate straight conduit runs. Four conduit knockouts are uniform 1/2" size with true pryout slots. Four "NM" (non-metallic) cable pryouts with integral strain relief also included. Quick-connect wiring connectors included.

Socket: Ceramic socket with reflector for bi-pin MR16 lamps.

Bar Hangers: Pre-installed, captive bar hangers allow housing to be positioned at any point within a 24" joist span. Score lines provided for easy shortening for 12" joists. Integral nail simplifies installation. Bar hangers can be repositioned 90°. Hangers fit onto T-bar spline for quick alignment.

Transformer: 120V Integral magnetic transformer steps line voltage down to lamp operating voltage. For MR16 lamps up to 50W.

Thermal Protector: Self resetting thermal protector deactivates fixture if overheating occurs due to improper lamping or misapplied insulation.

EI400LVAT

4" Aperture

IC AIR-TITE Housing for Insulated Ceilings

12V Low Voltage MR16 Lamp

The EI400LVAT housing has an integral low voltage transformer that supplies 12 volts to MR16 lamps. It can be used in ceilings where it will be in direct contact with insulation. The EI400LVAT is suited for use in insulated ceilings in residential and commercial applications. It is an AIR-TITE housing designed to prevent air flow between living spaces and unconditioned attic spaces.

Housing: Double wall aluminum construction for greater heat dissipation. EI400LVAT housing is gasketed to prevent airflow from heated or air conditioned spaces.

Plaster Frame: Inner housing adjusts in plaster frame for ceilings up to 1" thick. Includes locking screws for hanger bars and cutouts for crimping hanger bars in position.

Junction Box: Listed for through branch circuit wiring. Positioned to accommodate straight conduit runs. Seven conduit knockouts are uniform 1/2" size with true pryout slots. Four "NM" (non-metallic) cable pryouts with integral strain relief also included. Quick-connect wiring connectors included.

Bar Hangers: Pre-installed, captive bar hangers allow housing to be positioned at any point within a 24" joist span. Score lines provided for easy shortening for 12" joists. Integral nail simplifies installation. Bar hangers can be repositioned 90°. Hangers fit onto T-bar spline for quick alignment.

Transformer: 120V integral magnetic transformer steps line voltage down to lamp operating voltage.

Thermal Protector: Self resetting thermal protector deactivates fixture if overheating occurs due to improper lamping.

ET500

5" Aperture

Non-IC Housing for
Use In Uninsulated
Ceilings

Any Insulation
Present Must Be
Kept 3" From
Housing

The ALL-PRO ET500 has a 5" aperture designed for PAR20 and PAR30 halogen lamps. The 5" diameter trim size makes this series the right choice for applications where dramatic yet inconspicuous lighting is required and higher wattages are desired. If the ET500 is used in insulated ceilings, insulation must be kept 3" from all sides of fixture.

Housing: Die-stamped 22 gauge CRS with white powder coat finish. Housing adjusts in plaster frame to accommodate ceiling up to 1-3/8" thick.

Plaster Frame: Galvanized steel construction. The housing can be removed from plaster frame to provide access to the junction box. Regressed locking screw for securing hanger bars. Cutouts for easily crimping hanger bars in position

Junction Box: Listed for through branch circuit wiring. Positioned to accommodate straight conduit runs. Seven conduit knockouts are uniform 1/2" size with true pryout slots. Four "NM" (non-metallic) cable pryouts with integral strain relief also included. Quick-connect wiring connectors included.

Bar Hangers: Pre-installed, captive bar hangers allow housing to be positioned at any point within a 24" joist span. Score lines provided for easy shortening for 12" joists. Integral nail simplifies installation. Bar hangers reposition 90°. Integral T-bar clip snaps onto T-bar spline for quick alignment.

Socket: Porcelain socket with nickel plated brass screw shell snaps into trim for consistent lamp positioning. Shipping insert protects socket from overspray.

Thermal Protector: Self resetting thermal protector deactivates fixture if overheating occurs due to improper lamping or incorrect application of insulation material.

ET500R

5" Aperture

Non-IC Housing for
Use In Uninsulated
Ceilings

Any Insulation
Present Must Be
Kept 3" From
Housing

The ALL-PRO ET500R remodel housing has a 5" aperture designed for PAR20 and PAR30 halogen lamps. The five inch" diameter trim size makes this series the right choice for applications where dramatic yet inconspicuous lighting is required and higher wattages are desired. If the ET500R is used in insulated ceilings, insulation must be kept 3" from all sides of fixture. The ET500R can be installed from below the ceiling.

Housing: Die-stamped 22 gauge CRS with white powder coat finish. Housing will slip through 5-1/2" ceiling opening. Integral flange secures fixture against ceiling.

Remodel Clips: Four remodel clips secure housing and accommodate 1/2" and 5/8" ceiling thickness.

Junction Box: Listed for through branch circuit wiring. Positioned to accommodate straight conduit runs. Seven conduit knockouts are uniform 1/2" size with true pryout slots. Four "NM" (non-metallic) cable pryouts with integral strain relief also included. Quick-connect wiring connectors included.

Socket: Porcelain socket with nickel plated brass screw shell, snaps into trim for consistent lamp positioning. Shipping insert protects socket from overspray.

Thermal Protector: Self resetting thermal protector deactivates fixture if an incorrect lamp is used or if ceiling insulation material is not applied correctly.

IC Housing for
Insulated
Ceilings

The ALL-PRO EI700 housing is designed for use in insulated ceilings where the housing will be in direct contact with insulation material.

Housing: Aluminum construction for greater heat dissipation.

Socket Plate: Rigid socket plate adjusts and locks without tools for various lamp sizes.

Plaster Frame: Housing adjusts in plaster frame to accommodate up to 1-3/4" thick ceilings. Plaster frame includes locking screw for securing hanger bars and cutouts for crimping hanger bars in position.

Junction Box: Listed for through branch circuit wiring. Positioned to accommodate straight conduit runs. Seven conduit knockouts are uniform 1/2" size with true pryout slots. Four pryouts with integral strain relief simplify non-metallic sheathed cable installation. Quick-connect wiring connectors included.

Bar Hangers: Pre-installed, captive bar hangers allow housing to be positioned at any point within a 24" joist span. A set screw locks housing in position. Score lines allow field shortening for 12" joists. Integral nail simplifies installation. Bar hangers can be repositioned 90° without tools. Integral T-bar clip snaps onto T-bar spline for quick alignment.

Socket: Porcelain socket with nickel plated brass screw shell. Shipping insert protects socket against overspray

Thermal Protector: Self resetting thermal protector deactivates fixture if overheating occurs due to improper lamping.

- Labels**
- UL/cUL listed for direct contact with Insulation and Combustible Material
 - UL/cUL Listed for Feed Through
 - UL/cUL Listed for Damp Location
 - IP Rated

Remodel
Housing

The ALL-PRO EI700R remodel housing is designed for installations where the housing will be in direct contact with insulation. The housing can be installed from below the ceiling.

Housing: Aluminum housing for greater heat dissipation.

Socket Plate: Rigid socket plate adjusts and locks without tools for various lamp sizes.

Junction Box: Listed for through branch circuit wiring. Seven conduit knockouts are uniform 1/2" size with true pryout slots. Four "NM" (non-metallic) cable pryouts with integral strain relief included. Quick-connect wiring connectors included.

Remodel Clips: Four remodel clips secure housing and accommodate 1/2" and 5/8" ceiling thickness.

Socket: Porcelain socket with nickel plated brass screw shell. Shipping insert protects socket against overspray.

Thermal Protector: Self resetting thermal protector deactivates fixture if overheating occurs due to improper lamping.

Any Insulation
Present Must Be
Kept 3" From
Housing

The ALL-PRO ET700 is designed for use in non-insulated ceilings in residential and commercial applications. If ceiling insulation is present, it must be kept 3" from all sides of the fixture.

Housing: Die-stamped 20 gauge CRS with white powder coat finish.

Socket Plate: Rigid socket plate adjusts and locks without tools for various lamp sizes.

Plaster Frame: Housing adjusts in plaster frame to accommodate ceilings up to 1-3/4" thick. Includes locking screw and cutouts for crimping hanger bars in position.

Junction Box: Listed for through branch circuit wiring. Positioned to accommodate straight conduit runs. Seven conduit knockouts are uniform 1/2" size with true pryout slots. Four "NM" (non-metallic) cable pryouts with integral strain relief also included. Quick-connect wiring connectors included.

Bar Hangers: Pre-installed, captive bar hangers allow housing to be positioned at any point within a 24" joist span. A set screw locks bar hangers in position. Score lines allow field shortening for 12" joists. Integral nail simplifies installation. Bar hangers can be repositioned 90° without tools. Integral T-bar spline snaps onto T-bar for quick alignment.

Socket: Porcelain socket with nickel plated brass screw shell. Shipping insert protects socket against overspray

Thermal Protector: Self resetting thermal protector deactivates fixture if overheating occurs due to improper lamping or misapplied insulation.

6" Aperture

IC Housing for
Insulated
Ceilings

The ALL-PRO EI700U housing is designed to be used in direct contact with insulation. The All-Pro EI700U housing is suited for use in insulated ceilings in residential and commercial applications. The IC construction allows an unbroken insulation barrier to be maintained.

Housing: Double wall aluminum construction for greater heat dissipation. Double wall housing allows higher wattages on select trims than single wall IC housing.

Socket Plate: Fixed socket plate maintains consistent lamp position.

Plaster Frame: Housing adjusts in plaster frame 1" to accommodate different ceiling thicknesses.

Junction Box: Listed for through branch circuit wiring. Accommodates straight conduit runs. Seven conduit knockouts are uniform 1/2" size with true pryout slots. Four "NM" (non-metallic) cable pryouts with integral strain relief also included. Quick-connect wiring connectors included.

Bar Hangers: Pre-installed, captive bar hangers allow housing to be positioned at any point within a 24" joist span. A set screw locks housing in position. Score lines allow shortening for 12" joists. Integral nail simplifies installation. Bar hangers can be repositioned 90° without tools. Integral T-bar spline snaps onto T-bar for quick alignment.

Socket: Porcelain socket with nickel plated brass screw shell. Shipping insert protects socket against overspray.

Thermal Protector: Self resetting thermal protector deactivates fixture if overheating occurs due to improper lamping.

Ceilings

For Shallow
Ceilings

The ALL-PRO EI2700 housing is designed for use in shallow ceilings where 2"x6" joist construction is used. It is also designed for shallow ceilings where insulation is present and where the housing will be in direct contact with insulation.

Housing: Aluminum housing for greater heat dissipation.

Socket Plate: Rigid socket plate adjusts and locks without tools for various lamp sizes.

Plaster Frame: Housing adjusts in plaster frame 1-3/8" to accommodate different ceiling thicknesses.

Junction Box: Listed for through branch circuit wiring. Positioned to accommodate straight conduit runs. Seven conduit knockouts are uniform 1/2" size with true pryout slots. Four "NM" (non-metallic) cable pryouts with integral strain relief also included. Quick-connect wiring connectors included.

Bar Hangers: Pre-installed, captive bar hangers allow housing to be positioned at any point within a 24" joist span. A set screw locks bar hangers in position. Score lines allow shortening for 12" joists. Integral nail simplifies installation. Bar hangers can be repositioned 90° without tools. Integral T-bar clip snaps onto T-bar spline for quick alignment.

Socket; Porcelain socket with nickel plated brass screw shell. Shipping insert protects socket against overspray.

Thermal Protector: Integral Thermal Protector deactivates fixture if an incorrect lamp is used.

6" Aperture

Non-IC for
Non-insulated
Ceilings

Insulation Must
Be Kept 3"
from
Housings

For Slope Ceilings

The ALL-PRO ET4700 housing is designed for sloped ceiling installations in ceilings ranging from 2/12 to 6/12 pitch. The socket aiming mechanism allows the lamp to be aimed straight down regardless of ceiling pitch. It is also designed for use in non-insulated ceilings. If insulation is present it must be kept 3" from all sides of the housing.

Housing Features: Thermal protector guards against misuse of insulation materials. Telescoping housing for ceiling construction down to 2"x 8". With deeper ceilings the telescoping feature provides deeper lamp position. Exclusive socket aiming mechanism swivels and rotates to properly align lamp. Slope indicator provides quick and consistent lamp settings (factory set for 3/12 slope).

Junction Box: Listed for through branch circuit wiring. Positioned to accommodate straight conduit runs. Seven conduit knockouts are uniform 1/2" size with true pryout slots. Four "NM" (non-metallic) cable pryouts with integral strain relief also included. Quick-connect wiring connectors included.

Bar Hangers: Pre-installed, captive bar hangers allow housing to be positioned at any point within a 24" joist span. A set screw locks bar hangers in position. Score lines allow field shortening for 12" joists. Integral nail simplifies installation. Bar hangers can be repositioned 90° without tools. Integral T-bar clip clips onto T-bar spline for quick alignment.

Socket: Porcelain socket with nickel plated brass screw shell, snaps into trim for consistent lamp positioning. Shipping insert protects socket from overspray.

Trim: One piece seamless baffle presents a clean finished appearance.

air-tite

6" Aperture
IC Insulated Ceiling
EI4700AT is
IC AIR-TITE
For Slope Ceilings

Designed for sloped ceiling installations for ceilings from 2/12 to 6/12 pitch. The socket aiming mechanism allows the lamp to be aimed straight down regardless of ceiling pitch. EI4700AT is sealed and gasketed to limit airflow between attic areas and heated or air conditioned living areas.

Housing Features: Integral thermal protector guards against improper lamping. Housing has AIR-Tite gasket pre-installed for ASTM-E283 compliance. Double wall housing construction. Door in outer housing allows junction box access from below ceiling. Exclusive socket aiming mechanism swivels and rotates to properly align lamp. Slope indicator provides quick and consistent lamp settings (factory set for 3/12 slope).

Junction Box: Listed for through branch circuit wiring. Positioned to accommodate straight conduit runs. Seven conduit knockouts are uniform 1/2" size with true pryout slots. Four "NM" (non-metallic) cable pryouts with integral strain relief. Quick-connect wiring connectors included.

Bar Hangers: Pre-installed, captive bar hangers allow housing to be positioned at any point within a 24" joist span. A set screw is provided to lock bar hangers in position along bar hangers. Score lines provided for easy shortening for 12" joists. Integral nail simplifies installation. Bar hangers can be repositioned 90° without tools. Integral T-bar clip snaps onto T-bar spline for quick alignment.

Trim: One piece seamless baffle presents a clean finished appearance.

Listings:

- UL/cUL Listed for Damp Location
- UL/cUL Listed for FeedThrough
- UL/cUL Listed for Direct Contact with Insulation and combustible material

EI4700AT also meets the following requirements:

- Washington State Energy Code
- State of California Title 24 Low Efficacy Luminaire IC and AT requirement
- International Energy Conservation Code (IECC)
- New York State Energy Conservation Construction Code (NY-ECCC)
- Certified Under ASTM-E283
