A New Performance Standard in LED Roadway Lighting
With industry-leading, patented optics in a scalable package, the Navion LED area, site and roadway luminaire delivers state-of-the-art optical control, low maintenance costs, rugged construction and modern styling. The Navion luminaire is designed for years of operation with minimal service requirements. Its superior performance and configurability provide uniform, glare-free, energy-efficient light for commercial, industrial and municipal parking lots as well as roadway applications.

Long Life with Low Maintenance Costs
Superior illumination, low maintenance, long life and low cost of ownership are critical factors when lighting roads and public spaces. Ideal for retrofit and new construction applications, the Navion fixture can be tailored to meet your most important needs without compromising on specification features. The five housing configurations of the Navion luminaire allow scalability from 2,582 to 33,732 delivered lumens. The 4000K/70 CRI is standard, with 6000K/70 CRI and 3000K/70 CRI options available. LED components are IP66 rated and the fixture is wet location listed, with an IP66 housing option available.

Roadway Lighting Redefined
Customer-Focused Design

Designed to meet the full range of outdoor lighting challenges in area, site and roadway applications, the Navion luminaire is available with a wide array of optics and specification performance features. A tool-less, removable power tray door and quick electrical disconnects make installation and maintenance easy. The 10kV common surge (line-to-ground) and differential surge (line-to-line) protection is standard. Four-bolt mounting with cast-in leveling steps ensures simple installation, while a super TGIC polyester powder-coat finish provides years of worry-free ownership.
Design Excellence

Stepping Up to the Challenge
The Navion luminaire is designed to provide superior optical performance in a package that is easy to install and maintain. With HID equivalents from 70W HPS up to 750W Pulse Start MH, along with the industry-leading AccuLED Optics™ system from Eaton’s Cooper Lighting business, the Navion fixture is designed to meet the toughest lighting challenges.

Construction
- Tool-less entry with hinged, removable power door for easy maintenance
- 3G vibration rated
- IP66-Rated LED Light Squares
- Wet location-rated housing (IP66 housing optional)
- Extruded aluminum heat sink scaled to lumen package
- Rugged, die-cast aluminum housing

Electrical
- Operates in -40°C to 40°C ambient temperatures (optional 50°C high ambient configuration)
- 10kV common surge (line-to-ground) and differential surge (line-to-line) protector
- >L90, 60,000 hours at 40°C, compliant with IESNA TM-21
- LED driver is mounted directly to removable door for optimal heat sinking
- 120-277V 50/60Hz, 347V 60Hz or 480V 60Hz operation
- Quick disconnects for tool-less removal of power door

Controls
- Standard with 0-10V dimming driver(s)
- Optional occupancy sensor
- Optional wireless control and monitoring system

Finish
- Five-stage super TGIC paint resists extreme weather conditions while providing optimal color and gloss retention. It’s available in standard grey or optional bronze, black, dark platinum, graphite metallic or white.

Warranty
- Five-year warranty

Tool-less Entry
Stainless steel latches provide easy, tool-less access to electrical compartment, even with lineman’s gloves.

Quick Disconnects
Connections between power door and housing are made with tool-less quick disconnects. Power door removes in seconds.

Bird Guard

Four-Bolt Mounting
Extruded Aluminum Heat Sinks

Tool-less Entry

Scalable Lumen Package . . . .

Self-Cleaning Heat Sinks

Optional Features

NEMA Photocontrol Receptacle
Gasketed receptacle for mounting standard NEMA photocontrol (order separately).

Surge Protection
A 10kV common surge (line-to-ground) and differential surge (line-to-line) mode protection is standard.

Occupancy Sensor
The optional motion sensor reduces energy use for site lighting applications.

IP66 Rating
Housing is available with IP66 rating for dust and water.
Scalable Illumination with LED Light Squares

Energy Savings and Environmental Stewardship
The simplest and most effective way to reduce a lighting fixture’s impact on the environment is to minimize its energy consumption. By incorporating Light Squares from Eaton’s Cooper Lighting business, the Navion LED luminaire provides energy savings up to 75 percent compared to standard HID solutions.

Long Life
With a 60,000+ hour rated life (at greater than 90 percent lumen maintenance), the Navion LED luminaire operates up to six times longer than traditional metal halide fixtures.

Low Maintenance
With simple quick disconnects, the Light Squares are easily removed in the field for replacement or for the rotation of the optics.

Warm White Color
Lighting designers, architects and specifying engineers have long preferred light sources that provide a balanced spectral power distribution and warm white light. Many LED solutions standardize on a cool blue 5000-6000K correlated color temperature (CCT) to maximize lumen output. The Navion luminaire provides warm white light at a standard 4000K CCT with no sacrifice in lumen output.

Superior Efficiency and Control
With efficiencies as high as 95 percent, the patented AccuLED Optics™ system is up to 30 percent more efficient than traditional HID optical systems. Available in 16 optional distributions, this system provides the flexibility and performance required for outdoor applications.

House Side Shield
For stringent light trespass requirements and the ultimate level of backlight control, a house side shield accessory is available for factory or field installation. Designed to seamlessly integrate with the SL2, SL3, SL4 and AFL distributions, the house side shield virtually eliminates backlight and also enhances visual comfort.
Optical Performance Redefined

Performance and Scalability
The Navion luminaire is designed around superior optical performance and scalability. With a choice of 15 lumen packages and 16 optical distributions, the optimal configuration can be used to maximize light levels while minimizing operating costs.

### Power Consumption (Watts)

<table>
<thead>
<tr>
<th>Number of Light Squares</th>

### Efficacy (lm/W)

- **1A**
  - 100 Lumens Per Watt (lm/W)
- **700mA**
  - 110 Lumens Per Watt (lm/W)
- **530mA**
  - 120 Lumens Per Watt (lm/W)

NOTE: Nominal efficacy at 4000K CCT

### Optical Distributions
The Navion luminaire has a choice of seven asymmetric area, three asymmetric roadway, three symmetric and three specialized distributions.

#### Asymmetric Area Distributions
- **T2** (Type II)
- **SL2** (Type II with Spill Control)
- **T3** (Type III)
- **SL3** (Type III with Spill Control)
- **T4FT** (Type IV Forward Throw)
- **T4W** (Type IV Wide)
- **SL4** (Type IV with Spill Control)

#### Asymmetric Roadway Distributions
- **RW** (Rectangular Wide Type II)
- **T2R** (Type II Roadway)
- **T3R** (Type III Roadway)

#### Symmetric Distributions
- **5NQ** (Type V Square Narrow)
- **5MQ** (Type V Square Medium)
- **5WQ** (Type V Square Wide)

#### Specialized Distributions
- **AFL** (Automotive Frontline)
- **SLL** (90° Spill Light Eliminator Left)
- **SLR** (90° Spill Light Eliminator Right)
Configuration Flexibility

Performance and Versatility
The Navion luminaire is built around LED technology and designed to accommodate ongoing improvements in LED chips and drivers, making it the ideal solution for both current and future lighting requirements.

Pedestrian Pathway
The Navion luminaire’s enhanced lighting performance and uniformity provides a safe and secure environment for pedestrians while improving energy efficiency.

Commercial
The Navion luminaire offers a long life and additional savings in maintenance costs packaged in a modern design for commercial applications, such as office buildings and shopping centers.

Industrial
Illuminating large areas without unnecessary glare or light spillage, while controlling the light distribution, makes the Navion luminaire an ideal solution for industrial applications, such as manufacturing and distribution.
Versatility and Simplicity

The Navion luminaire is designed to meet a wide range of outdoor lighting needs, from single-fixture applications to large-scale parking lots. Commercial customers will find it ideal for office buildings and shopping centers. Its higher lumen configurations excel in large parking applications, such as institutions, retail, airports, manufacturing and distribution facilities.

Whatever the application, the Navion luminaire delivers superior optical performance in a durable, modern design, while providing up to 70 percent less energy usage compared to typical HID luminaires. With greater than 90 percent lumen maintenance at 60,000 hours (over 16 years at 10 hours daily use), the Navion fixture offers a long life and additional savings in maintenance costs.

The Navion luminaire is offered in 16 optical packages to meet the exact needs of the illuminated area. The fixture’s size and construction are scaled to the specific lumen package. Designed to withstand harsh environments, its rugged, die-cast aluminum construction and 2.5-mil polyester powder-coat finish provide superior protection. The 3G vibration rating and 10kV dual-mode surge protection are standard.

Ease of Installation and Maintenance

The Navion luminaire’s performance comes with years of low-cost, low-hassle ownership. With lumen maintenance and life expectancy far beyond traditional HID light sources, regular and time-consuming service visits are a thing of the past. The simple and spacious Navion fixture housing is designed to fit lineman’s gloves and can be installed with simple tools. Key electrical components are mounted on the power door, so service is tool-less. The door is small enough to hold in one hand, making field replacement quick and easy.

Tool-less Access
Stainless steel latches provide easy, tool-less access to the electrical compartment, even with lineman’s gloves.

Hinged, Removable Power Door
Driver and surge protector is mounted to door. Power door hangs securely and can be easily removed without the use of tools.
Occupancy Sensing

Accelerate Payback on your Investment
To further enhance energy savings, the Navion luminaire offers an optional occupancy sensor that is integral to each individual luminaire. When the area surrounding the luminaire is unoccupied, the sensor has the ability to reduce light levels and power consumption. In addition to financial benefits, all the control options for the Navion luminaire are designed to be simple and cost-effective ASHRAE and Title 24 compliant solutions.

Dimming Occupancy Sensor (DOS)
When the DOS option is selected, the occupancy sensor is connected to a dimming driver and the entire luminaire dims when there is no activity detected. When activity is detected, the luminaire returns to full light output. The sensor is factory preset to dim down to approximately 50 percent lumen output with a time delay of five minutes. To change these settings, a FSIR-100 accessory can be purchased. The FSIR-100 is a wireless configuration tool that allows the dimming level, time delay, sensitivity and other parameters to be changed. Consult a representative from Eaton’s Cooper Lighting business for additional details.

LumaWatt Wireless Control and Monitoring System (DIMRF-LW and DIMRF-LN)
The LumaWatt system is best described as a peer-to-peer wireless network of luminaire-integral sensors that operate in accordance with programmable profiles. The end user can create and manage sensor profiles with browser-based management software and broadcast to the sensors as necessary via wireless gateways. Each sensor is capable of motion and photo sensing, metering power consumption and wireless communication. For additional details, refer to www.cooperlighting.com.
