### **Cooper Controls Announces Mobile App for Venergy™ Advanced Metering System Now Available on iTunes**

*Download the Venergy app from iTunes to monitor real-time building energy consumption on an iPad™, iPhone™ or iPod touch™.*

**PEACHTREE CITY, GA, October 3, 2011** – The mobile app for the Venergy Advanced Metering System (AMS) from Cooper Controls is now available on iTunes. Venergy customers can download the Venergy mobile app from the iTunes App Store and start viewing the real-time energy consumption of their building on an iPad, iPhone or iPod touch. Interested visitors who have not purchased a Venergy system can download the free app and experience a demo of the energy monitoring application. When prompted for a user name and password, simply enter “demo” (all lowercase).

To locate the Venergy mobile app, visit the iTunes App Store and search for Venergy by Cooper Controls. Select either the iPhone app or iPad app for the Venergy Advanced Metering System and download for free.

The Venergy web application provides users with a snapshot of the energy consumption of a building that is updated every 60 seconds. This mobile app provides real-time visibility to the performance of all electric load types (lighting, HVAC, plug loads, photovoltaic, etc.) as well as water, air, gas and steam. It also provides minute-by-minute utility costs, compares the energy performance of top consumers, will provide mobile alerts if an issue arises, and enables facility managers to identify areas where energy savings can be created.

Cooper Controls has developed Venergy web applications that are compatible with the iPad, iPhone, iPod touch, Sony Dash, PC, and a touchscreen or plasma/LCD television display. Users may view the

highly visual and easy-to-understand energy snapshot of their building in real time on their preferred device.

The Venergy Advanced Metering System is a comprehensive energy metering solution complete with all of the hardware and software components necessary to measure, store, report and view the real-time energy consumption of a building. Available components include all of the meters, sub meters, network gateways, web applications, and a web-hosted data system enabling owners and facility managers to access energy usage reports at anytime from anywhere in the world.

### **About Cooper Controls**

Cooper Controls, a business unit of Cooper Lighting, is a market leader in energy management, architectural, and entertainment lighting controls. A subsidiary of global manufacturer Cooper Industries plc (NYSE: CBE), it was formed by its acquisition of Novitas Inc. in November 2005, Polaron plc in March 2007, PCI Lighting Control Systems in August 2007, and ALC Lighting Controls in November 2010. Cooper Controls includes leading brands such as iLight (International), iLumin (North America), Greengate, and Zero 88. For more information, visit [www.coopercontrol.com](http://www.coopercontrol.com).

### **About Cooper Industries**

Cooper Industries plc (NYSE: CBE) is a global electrical products manufacturer with 2010 revenues of \$5.1 billion. Founded in 1833, Cooper's sustained success is attributable to a constant focus on innovation, evolving business practices while maintaining the highest ethical standards and meeting customer needs. The Company has seven operating divisions with leading market positions and world-class products and brands including: Bussmann electrical and electronic fuses; Crouse-Hinds and CEAG explosion-proof electrical equipment; Halo and Metalux lighting fixtures; and Kyle and McGraw-Edison power systems products. With this broad range of products, Cooper is uniquely positioned for several long-term growth trends including the global infrastructure build-out, the need to improve the reliability and productivity of the electric grid, the demand for higher energy-efficient products and the need for improved electrical safety. In 2010 fifty-nine percent of total sales were to customers in the industrial and utility end-markets and thirty-nine percent of total sales were to customers outside the United States. Cooper has manufacturing facilities in 23 countries as of 2011. For more information, visit the website at [www.cooperindustries.com](http://www.cooperindustries.com).
