Cooper Wiring Devices Introduces Line of Dimmable LED Nightlights

The only combination nightlight on the market that allows the user to set the light level is now available from Cooper Wiring Devices.

PEACHTREE CITY, GA, July 25, 2011 – [Cooper Wiring Devices](#) introduces its line of [Patrol™ Dimmable Combination Wallbox Nightlights](#), the only dimmable LED nightlights available that allow the user to set the light level. Cooper Wiring Devices, a leading electrical wiring device manufacturer for industrial, commercial and residential applications, developed three different dimmable combination nightlight products including [full nightlight](#), [nightlight with a single pole switch](#), and [nightlight with a tamper resistant receptacle](#). Patrol dimmable combination nightlights with LED lamps rated for 50,000+ hours lamp life are ideal for use in residential and commercial applications, including hotels, dormitories and assisted living facilities.

The Patrol product line from Cooper Wiring Devices was designed to promote safety in way-finding applications and low-light task illumination. The dimmable feature allows users to set the appropriate level for the specific application and use. The nightlights feature a convenient light level sensor which turns off the nightlight when there's available daylight and on when light is insufficient. In addition to full dimming, the nightlights feature 3 preset levels to easily match light levels when devices are mounted in series. The nightlights are also constructed with patented built-in wire strippers and backed out terminal screws that are ready for wiring.

The combination dimmable LED nightlight with tamper resistant receptacle provides the convenience of a nightlight with the functionality of a receptacle. Ideal for a child's bedroom, the combination nightlight/receptacle features UL listed tamper resistant safety shutters that prevent the insertion of foreign objects. The combination dimmable LED nightlight with single pole switch is ideal for bathrooms and provides the same light control benefits with added switch functionality. The line also features a

dimnable full LED wallbox nightlight. Ideal for bathrooms, hallways, stairs and landings, the flush-mount LED full nightlight provides added safety and features low wattage long lasting LED lamps that are dimmable to the desired light level.

“Cooper Wiring Devices is excited to offer this line of dimmable LED nightlights, the only products on the market of their kind,” said Daniel Castillo, Vice President and General Manager, Cooper Wiring Devices. “This line is another example of our goal to design innovative products that exceed the needs of our customers. With the option of a combination tamper resistant receptacle and nightlight, switch functionality and the full LED nightlight wallbox, we’re proud of the range of applications in which our products can be used.”

About Cooper Wiring Devices

Cooper Wiring Devices, a trusted name in electrical products, features Arrow Hart commercial and industrial solutions, CORE Lighting Controls, residential wiring devices and Cooper Interconnect industrial, military, aerospace, and subsea connectivity solutions. Cooper Wiring Devices is committed to providing products that increase productivity, energy efficiency, safety at work and in the home, and provide reliable performance. Cooper Interconnect, a Cooper Wiring Devices’ business unit, is a leading manufacturer of sophisticated interconnect solutions for demanding environments and features well-known brands such as G&H, WPI, Burton, General Connector brands Cam-Lok, and Thorkom. A division of Cooper Industries plc (NYSE: CBE), Cooper Wiring Devices is headquartered in Peachtree City, GA with international manufacturing and distribution facilities. For more information on Cooper Wiring Devices visit www.cooperwiringdevices.com.

About Cooper Industries

Cooper Industries plc (NYSE: CBE) is a global electrical products manufacturer with 2010 revenues of \$5.1 billion. Founded in 1833, Cooper’s sustained success is attributable to a constant focus on innovation, evolving business practices while maintaining the highest ethical standards and meeting customer needs. The Company has seven operating divisions with leading market positions and world-class products and brands including: Bussmann electrical and electronic fuses; Crouse-Hinds and CEAG explosion-proof electrical equipment; Halo and Metalux lighting fixtures; and Kyle and McGraw-Edison power systems products. With this broad range of products, Cooper is uniquely positioned for several long-term growth trends including the global infrastructure build-out, the need to improve the reliability and productivity of the electric grid, the demand for higher energy-efficient products and the need for improved electrical safety. In 2010 fifty-nine percent of total sales were to customers in the industrial and utility end-markets and thirty-nine percent of total sales were to customers outside the United States. Cooper has manufacturing facilities in 23 countries as of 2011. For more information, visit the website at www.cooperindustries.com.
