KA717L1 Type L recloser one-shot kit installation instructions (consists of KA717L2 and KA717L3)
DISCLAIMER OF WARRANTIES AND LIMITATION OF LIABILITY

The information, recommendations, descriptions and safety notations in this document are based on Eaton Corporation’s (“Eaton”) experience and judgment and may not cover all contingencies. If further information is required, an Eaton sales office should be consulted. Sale of the product shown in this literature is subject to the terms and conditions outlined in appropriate Eaton selling policies or other contractual agreement between Eaton and the purchaser.

THERE ARE NO UNDERSTANDINGS, AGREEMENTS, WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE OR MERCHANTABILITY, OTHER THAN THOSE SPECIFICALLY SET OUT IN ANY EXISTING CONTRACT BETWEEN THE PARTIES. ANY SUCH CONTRACT STATES THE ENTIRE OBLIGATION OF EATON. THE CONTENTS OF THIS DOCUMENT SHALL NOT BECOME PART OF OR MODIFY ANY CONTRACT BETWEEN THE PARTIES.

In no event will Eaton be responsible to the purchaser or user in contract, in tort (including negligence), strict liability or otherwise for any special, indirect, incidental or consequential damage or loss whatsoever, including but not limited to damage or loss of use of equipment, plant or power system, cost of capital, loss of power, additional expenses in the use of existing power facilities, or claims against the purchaser or user by its customers resulting from the use of the information, recommendations and descriptions contained herein. The information contained in this manual is subject to change without notice.

Safety for life

Eaton meets or exceeds all applicable industry standards relating to product safety in its Cooper Power™ series products. We actively promote safe practices in the use and maintenance of our products through our service literature, instructional training programs, and the continuous efforts of all Eaton employees involved in product design, manufacture, marketing, and service.

We strongly urge that you always follow all locally approved safety procedures and safety instructions when working around high voltage lines and equipment, and support our “Safety For Life” mission.

Safety information

The instructions in this manual are not intended as a substitute for proper training or adequate experience in the safe operation of the equipment described. Only competent technicians who are familiar with this equipment should install, operate, and service it.

A competent technician has these qualifications:
• Is thoroughly familiar with these instructions.
• Is trained in industry-accepted high and low-voltage safe operating practices and procedures.
• Is trained and authorized to energize, de-energize, clear, and ground power distribution equipment.
• Is trained in the care and use of protective equipment such as arc flash clothing, safety glasses, face shield, hard hat, rubber gloves, clampstick, hotstick, etc.

Following is important safety information. For safe installation and operation of this equipment, be sure to read and understand all cautions and warnings.

Hazard Statement Definitions

This manual may contain four types of hazard statements:

<table>
<thead>
<tr>
<th>Hazard</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>DANGER</strong></td>
<td>Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.</td>
</tr>
<tr>
<td><strong>WARNING</strong></td>
<td>Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.</td>
</tr>
<tr>
<td><strong>CAUTION</strong></td>
<td>Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.</td>
</tr>
<tr>
<td><strong>CAUTION</strong></td>
<td>Indicates a potentially hazardous situation which, if not avoided, may result in equipment damage only.</td>
</tr>
</tbody>
</table>

Safety instructions

Following are general caution and warning statements that apply to this equipment. Additional statements, related to specific tasks and procedures, are located throughout the manual.

**DANGER**

Hazardous voltage. Contact with hazardous voltage will cause death or severe personal injury. Follow all locally approved safety procedures when working around high- and low-voltage lines and equipment.

**WARNING**

Before installing, operating, maintaining, or testing this equipment, carefully read and understand the contents of this manual. Improper operation, handling or maintenance can result in death, severe personal injury, and equipment damage.

**WARNING**

This equipment is not intended to protect human life. Follow all locally approved procedures and safety practices when installing or operating this equipment. Failure to comply can result in death, severe personal injury and equipment damage.

**WARNING**

Power distribution and transmission equipment must be properly selected for the intended application. It must be installed and serviced by competent personnel who have been trained and understand proper safety procedures. These instructions are written for such personnel and are not a substitute for adequate training and experience in safety procedures. Failure to properly select, install or maintain power distribution and transmission equipment can result in death, severe personal injury, and equipment damage.
Product information

Introduction
Service Information MN280019EN provides installation instructions for Eaton’s Cooper Power™ series Type L recloser one-shot kit. This kit literature is divided into two sections, the first section describes the modification to the head casting of the recloser, while the second section describes modification of the mechanism. Carefully read and understand the contents of this manual before installing this kit.

Read this manual first
Read and understand the contents of this manual and follow all locally approved procedures and safety practices before installing or operating this equipment.

Additional information
These instructions cannot cover all details or variations in the equipment, procedures, or process described nor to provide directions for meeting every possible contingency during installation, operation, or maintenance. For additional information, please contact your Eaton representative.

Acceptance and initial inspection
Each Kit is completely inspected at the factory. It is in good condition when accepted by the carrier for shipment.

Upon receipt, inspect the carton for signs of damage. Unpack the kit and inspect it thoroughly for damage incurred during shipment. If damage is discovered, file a claim with the carrier immediately.

Handling and storage
Be careful during handling and storage of the kit to minimize the possibility of damage. If the kit is to be stored for any length of time prior to installation, provide a clean, dry storage area. If storage is in a humid atmosphere, make provisions to keep the kit dry.

ANSI® standards
Eaton’s reclosers are designed and tested in accordance with ANSI® standards C37.60 and C37.85 and ANSI® guideline C37.61.

Quality standards
ISO 9001 Certified Quality Management System

**WARNING**

Before installing, operating, maintaining, or testing this equipment, carefully read and understand the contents of this manual. Improper operation, handling or maintenance can result in death, severe personal injury, and equipment damage.

**Head casting modification**

**Note:** It is recommended that the LA714L counter spring replacement kit be installed with this kit.

This kit is intended for installation on the following reclosers (serial number breaks and dates are approximate).

- L Reclosers built December 14, 1962 through November 6, 1967 S/N 40,500-72,000.

**Note:** The existing 8-32 hole for the set screw (see Figure 4), MUST be drilled out to .157 diameter (no. 21 drill) and tapped 10-32 UNC-2B. Reclosers in the range built after S/N 50,000 must have the existing hole in the side of the sleet hood for the “one-shot” stop tapped 1/4-20 UNC-2B.
Figure 2. Location of set-screw in head casting.

Type L reclosers built June 25, 1962 through December 14, 1962 (S/N 38,700 - 40,500) same as above with the exception of drilling and tapping the 1/4-20 UNC hole in the sleet hood. (See drawing LA717002).

Type L reclosers built before June 25, 1962 (S/N 38,700). It is necessary to modify the head assembly in the following manner.

1. Open the .375 diameter hole to .500 ± .001 diameter for the sleeve (See Figure 5).

Figure 3. Location of sleeve-hole in head casting.

Note: It is critical to follow the specified sequence for drilling and reaming.

The drilling/reaming sequence is as follows;
1. Drill hole to .406 dia.
2. Drill hole to .437 dia.
3. Drill hole to .484 dia.
4. Ream hole to .500 ± .001 dia.

Figure 4. Location of adjustment screw in head casting.

Installation procedure
(Refer to Service Information S280-15-1 Head Mechanism Section).

1. Insert L243 sleeve into sleeve hole (See Figure 3).
2. Install KA2023-6 set screw to secure sleeve.
3. Install one-shot lever assembly, and pin the cam lever assembly with provided groove pin (item 5).
4. Install trip lever assembly (protruding end goes under manual trip lever cam on lockout lever assembly, see Figure 4).
5. Operate the yellow handle to check engagement of trip lever.

Note: It may be necessary to file the top of the latch surface on the LA44 lockout lever assembly if excessive latch engagement or failure of latch to open is experienced (See Figures 5 and 6).

6. Install HHCS in head casting (See Figure 4).

Note: Make proper adjustment to be made during testing procedures.

Mechanism disassembly

With mechanism removed from the head portion of the recloser, proceed as follows (Refer to drawing LA78C).

1. Remove the four main springs (item 7) and four main spring yokes (item 5 on drawing number LA78C).
2. Disconnect straight line motion link from pivot pin by removing two retaining rings that connect pivot pin (item 15) to mechanism casting.
3. Remove groove pin (item 28) to allow clearance for disassembly and reassembly. Replace with groove new pin from kit.

Note: Casting may need to be drilled if unit was originally a riveted unit.
4. Remove retaining ring (item 12 on drawing LA78C) from pivot pin (item 16) connecting the straight-line motion link, and remove pivot pin.
5. Remove wire spring clip (item 9) on drawing LA78C, and remove pivot pin (item 10) pivot pin.
6. Remove #12 retaining ring, and #17 pivot pin (drawing number LA-78C).
7. Remove old plunger lever assembly (See Figure 8).

Note: On the post April 5 1962 reclosers, install ONLY items 1-5 from kit and discard items 7-8. Remove C-ring (one-each) from items 16, and 28 as shown on drawing LA78C to facilitate replacement of LA76 (item 8). Replace C-rings with two (2) of item 6 from this kit.

For Type L reclosers built prior to April 5 1962, use ALL items in kit and modify the mechanism frame as follows: (See Drawing L380D-2).

1. Drill out rivet in “E” hole and discard rivet and long spacer on rivet. Drill open “E” hole (both sides) to .312 + .005-.001 diameter.
2. Locate F hole (1/4 and 1-1/32 dimensions per print) and drill to .201 diameter. Perform Step 3 BEFORE tapping hole to 1/4-20 UNC-2B.
3. Spotface F hole 9/16 diameter approximately .065 deep using Kyle T1317 Spotface Tool.

Mechanism reassembly

1. Remove old plunger lever assembly, (See Figure 6).
2. Install new plunger lever assembly. Reinstall the four main springs onto mechanism.
3. Install shoulder pin and tighten.

Note: It is recommended to use Loctite® on threads of shoulder pin before installation.
4. Install spring guide.
5. Install trip lever.
6. Reinstall mechanism into head casting.

Note: Refer to Service Information S280-15-1 for additional information.

⚠️ WARNING

This equipment is not intended to protect human life. Follow all locally approved procedures and safety practices when installing or operating this equipment. Failure to comply can result in death, severe personal injury and equipment damage.

Return unit to service

Reference Service Information S280-10-8 Single Phase Installation and Operation Instructions manual before returning unit to service.
