

# Eaton & Cooper – united to power more possibilities

The reliability you expect.  
Introducing Cooper Power Systems by Eaton.

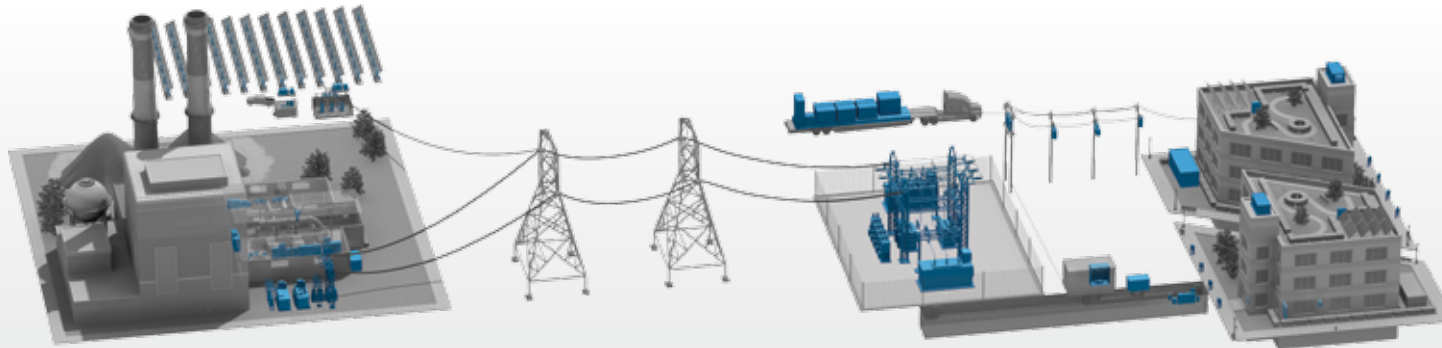

**Cooper  
Power Systems**  
by **EATON**

Power is the backbone of industry, and ensuring the availability of safe, reliable power is at the heart of Eaton's business. The Cooper Power Systems portfolio completes the picture with engineered systems, turnkey offerings and smart solutions that lead the industry. From transforming and regulating power delivery to

distributing and managing it through a facility, as well as the services and support needed to commission and keep it running, Eaton can now offer a full portfolio of solutions for the reliable, efficient use of power.

**More dependable. More efficient. Expect more.**

## GENERATION

- Integrated power assemblies
- Medium voltage switchgear
- Low voltage switchgear
- Medium voltage motor control and drives
- Low voltage motor control centers, drives, and replacement buckets
- Single- and three-phase UPS
- Safety and transfer switches
- Protective relays
- Power quality metering
- Medium voltage vacuum replacement breakers and starters
- Low voltage air replacement breakers and starters
- Remote racking products
- Life extension solutions for most manufacturers' equipment
- DC disconnects and switches
- Combiner boxes
- Solar ground and roof racks
- Fuses, AC and DC breakers
- SCADA
- Utility and commercial inverters
- Wiring devices
- Transformers and components
- Automation and control
- Deadbreak systems
- Distributed generation grid-tie switchgear, transfer and control

## SUBSTATION

- Surge arresters
- Medium voltage metal-clad switchgear
- Substation automation devices and software
- Transformers and components
- Voltage regulators and controls
- Power capacitors- open air, metal enclosed and mobile
- Substation design services
- Relay coordination services
- Turnkey project execution
- Engineering services
- SCADA
- Modular integrated transportable substation (MITS)
- Protective relays and controls

## DISTRIBUTION

- Power engineering analysis software
- Reclosers and controls
- Medium voltage switchgear and controls
- Capacitors, switches and controls
- Transformers and components
- Network protectors
- Sectionalizers
- Automation switches and controls
- Protective relays
- Voltage regulators and controls
- Smart sensors
- Feeder automation software
- Integrated Volt/VAR Control (IWCJ software)
- Control software
- Loadbreak and deadbreak connectors
- Fuses
- Surge arresters
- Tools and connectors

## END POINT

- Advanced metering infrastructure (AMI)
- Demand response (DR)
- Home area network
- Electric vehicle charging stations

## ENGINEERING SERVICES

- Installation and commissioning
- Turnkey project management
- System studies
- Safety audits
- Maintenance of all manufacturers' distribution and control equipment
- Forensic failure analysis
- Arc-flash reduction technologies
- Crisis response program management and rehabilitation
